Knowing what faulty vacuum hoses look like is an important part of keeping your car in good condition. Many of these hoses control your car's idle, emissions components and environmental controls such as your heat. This article will tell you how to check engine vacuum hoses.

~~How to Check Engine Vacuum Hoses: 4 Steps (with Pictures)~~

Step 1: Detach the suspect hose from the component. Make sure that the hose is still connected to the engine vacuum. For example, if you are checking the Exhaust Gas Recirculation (EGR) hose, unplug it at the EGR valve. Step 2: Attach the vacuum gauge to the hose. Make sure the hose and gauge are sealed properly, otherwise you will get a false reading.
