The success of every business in the hospitality industry depends on maximizing revenues and minimizing costs. This Ninth Edition continues its time-tested presentation of fundamental concepts and analytical techniques that are essential to taking control of real-world accounting systems, evaluating current and past operations, and effectively managing finances toward increased profits. It offers hands-on coverage of computer applications and practical decision-making skills to successfully prepare readers for the increasingly complex and competitive hospitality industry.

In examining a company for 335 years, Management Accounting at the Hudson's Bay Company: From Quill Pen to Digitization finds five significant management accounting changes. Each difficult to make change was made for significant strategic and survival reasons. Thus, the focus is on the making and remaking of management accounting.

Accounting for Decision Making and Control provides students and managers with an understanding appreciation of the strengths and limitations of an organization's accounting system, thereby allowing them to be more intelligent users of these systems. The Ninth Edition demonstrates that managerial accounting is an integral part of the firm's organizational architecture, not just an isolated set of computational topics. Managers in all organizations, throughout their professional careers, interact with their accounting systems as it is both a source of information for decision making and part of the organization's control mechanisms.
