Jefferson Graham, host of USA Today's Talking Tech and Talking Your Tech, takes you skillfully through the art of video creation and distribution. And you'll have a lot of fun along the way. You'll learn what equipment you need to get started—from bare bones to wish list state-of-the-art great. You'll get the skinny on sound and lighting. You'll learn how to properly set up for and shoot an interview. You'll even get to take your video to the next level by using multiple cameras as they do on TV. You'll also find 30 downloadable video lessons so you see the concepts from the book in action, including how to make a great video on an iPhone, lighting techniques, simple editing techniques, and much more. To access the videos go to www.peachpit.com/videoation and click "register your product." Here are just a few things you'll find in Video Nation: tips on developing fresh new ways to promote your business or yourself a guide to the tools available for a "one-man band" production, including advice on shooting with DSLRs, point-and-shoot cameras, and iPhones best techniques for setting up, preparing questions for, and interviewing a subject from a video producer who has interviewed everyone from comedian Jeff Dunham and the late Steve Jobs to Kermit the Frog detailed descriptions of working with sound and lighting for a variety of indoor and outdoor scenarios step-by-step coverage of using editing programs such as Apple iMovie, Adobe Premiere Elements, and Final Cut Pro X a guide to uploading your video to YouTube, create a channel, market your video with Twitter and Facebook, and earn thousands of dollars a year from your efforts via the YouTube Partner program and much more!

Americans have always been fascinated by birds and from the beginning American writers have captured this keen interest in a variety of genres- poems, journals, memoirs, short stories, essays, and travel accounts. Now, editors Terry Tempest Williams and Andrew Rubenfeld bring together the very best of this writing on America's birds in an astonshing collection that encompasses the Aleutian Islands and the Florida Keys, the Maine woods to the deserts of the southwest—and our own gardens and backyards feeders. What better companion to a field guide to the birds of North America than these personal accounts of birds and bird watching by a Who's Who of American literature? Put your binoculars aside and listen to the exquisite beauty of three Native American songs about birds, follow Lewis and Clark as they encounter new species on their journey across the continent, look over Audubon's shoulder as he sketches in New Orleans, and join Emerson and Thoreau rambling around Walden Pond. Here too are Theodore Roosevelt as he recalls the birds of his New York childhood, Rachel Carson observing a skimmer on the Atlantic coast, and Roger Tory Peterson casting a keen eye on snail kites and limpkins in the Everglades. Add to this an impressive array of modern and contemporary poets celebrating the wonder of birds and the joys of bird watching, including Robert Frost, Marianne Moore, Elizabeth Bishop, Sterling A. Brown, Cornelius Eady, Mary Oliver, Linda Hogan, and Louis Erdrich. This chronological survey of how and why Americans have watched birds makes the perfect gift for both the serious birder and the backyard watcher, indeed anyone who's ever been drawn by the wonder of birds.

In its 54 chapters, *Birding Florida* describes over 300 sites from Pensacola to the Dry Tortugas. Included are such hotspots as Everglades National Park, Fort De Soto and Ding Darling, Merritt Island and St. Marks National Wildlife Refuges, plus birding locations near the state's popular theme parks. Each site description includes an extensive bird list and detailed directions on how to get there. Also included are sections on Florida's diverse habitats, how to plan your trip and species accounts providing the best locations and seasons for each bird species.

The difference between seeing and looking is essential—much like the difference, in music, between hearing and listening. In *Creative Visualization*, master photographer, photo educator and photo instructor Rick Sammon presents his proven methodology for creative digital photography. His signature inspiring and motivating approach opens creative avenues for photographers in a variety of genres. With easy-to-follow examples, Sammon shows you how simple changes—with visualization, composition, post-processing, and more—can mean the difference between a snapshot and a great shot. This book, illustrated with more than 300 of Rick's photographs, includes invaluable information about exposure, composition, subject choice, lighting, mood, and depth. In the *Food for Thought* section, Rick offers guidelines for setting goals, getting motivated, connecting with a subject, learning, painting with light, thinking like a painter and more. In *Develop Your Creative Vision*, Rick takes you on an exploration of composition, exposure, making images with impact, creating a mood, altering reality, and pursuing your passion. Corrective and creative image processing techniques, as well as HDR, EDR, panoramas and black-and-white imaging, are covered in the *Image Processing Specialties* section. Rick also shares a chapter on self-assignments - photo challenges - that you can use to expand your photographic horizons. Canon Explorer of Light and master photographer Rick Sammon shares the secrets behind learning to see photographically, to make the necessary changes that will have a noticeable impact on your photographs Includes easy-to-follow instruction for post-processing techniques in Lightroom and Photoshop. Tips for making the best HDR and EDR images are also included, as well as illustrations of how plug-ins can help photographers awaken the artist within. Uses clear, visual examples of "photo failures" photographs side-by-side with successful ones, outlining the small, but important changes—to composition, framing, exposure, etc.—that can immediately make a significant difference

Transnational and transborder journalism are in a unique position to address public discourses on European and regional border-transcending identities. A valuable resource for journalists, students, and scholars of international communication, *Journalism across Borders* explores how journalists in the border regions of Europe navigate different journalistic cultures and the lack of established routines. Drawing on dozens of interviews and newsroom observation, Kevin Grieves addresses an overlooked but important aspect of international journalism by examining how journalists carry out their daily work in the transnational and regional transborder context.
