Virtual clinical excursions—medical-surgical [16] a virtual hospital setting in which you can work with multiple complex patient simulations and also learn to access and evaluate the information resources that are essential for high-quality patient care. The virtual hospital, Pacific View Regional Hospital, has realistic architecture and access to patient rooms, a Nurses' Station and a Medication Room.

Virtual Clinical Excursions is an innovative CD-ROM/workbook package that makes textbook content come alive and diminishes your anxiety about entering the clinical setting. VCE helps bridge the gap between the classroom and the real world by introducing you to clinical settings and critical thinking before you actually start clinical rotations - making the transition from nursing student to caregiver a smoother process. In this virtual hospital setting, you will interact with a variety of patients and gain valuable experience with documentation, communication, prioritization, medication safety, critical thinking, patient education, and care planning. Real-world nursing scenarios challenge you to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly engaging format encourages active learning and provides opportunities to collect and process data for evidence-based patient care; work with data entry and retrieval screens; access available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve your core computing skills. Includes over 250 NCLEX-RN examination-style questions based on the VCE patients. Augments knowledge of physical assessment by allowing you to examine and document vital signs, as well as assess information related to the head and neck, chest, back and spine, upper extremities, abdomen, pelvic, and lower extremities. The software allows you to access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. The realistic environment gives you the opportunity to monitor and care for one or more patients during three 45-minute periods of care within a 12-hour shift. Clinical Alerts highlight changes in the patient's condition. New flash-based technology is easier to use and offers seamless navigation. You can leave the software program at any time and return later to pick up where you left off without losing any information. Six unique new patients/cases feature new patient data in the Electronic Patient Record, Patient Charts, KARDEX, and Medication Administration Record. The workbook includes time icons that indicate how long it will take to complete a particular exercise. Icons for linked activities alert you when a particular workbook exercise is linked to another exercise and cannot be completed independently. A new Medication Room introduces you to a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. A medication administration feature enables you to select, prepare, and administer medications. Over 50 common medication errors embedded within the software challenge you to think critically about safe medication practices and follow safe medication standards. A Medication Scorecard provides instant feedback on what medications you administered correctly and which medications you administered incorrectly. The Examination Report checklist tracks your performance on Baseline and Focused assessments.

This workbook contains a CD-ROM featuring a virtual hospital setting with five highly individual patients. Users can access and review their charts, lab data, and medication administration records, assess them, monitor daily changes when their nurses take their vital signs and perform a variety of tests, formulate nursing diagnoses, and plan interventions. Each workbook lesson has a reading assignment from Lewis, Heitkemper & Dirksen: Medical-Surgical Nursing: Assessment and Management of Clinical Problems, 5th Edition, as well as activities that involve observing and interacting with the patients in the virtual hospital.

This money-saving package includes the 5th edition of Linton's Introduction to Medical-Surgical Nursing Textbook and Virtual Clinical Excursions for Introduction to Medical-Surgical Nursing, 5th edition.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions is an online program that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. By immersing students in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing users to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital - providing a perfect environment to "practice" what you are learning. IMPORTANT: The virtual hospital will be accessible online coming Fall 2013. Online workbook includes a set of lessons to prepare and guide you through a variety of patient scenarios, which are all connected to your textbook. Physical examination interactions include unique images and assessment findings for each patient scenario. Patient chart provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. Electronic patient record houses data from the patient's entire hospital stay and offers the ability to record new data findings. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments involving medication administration. NEW! Online format enables you to access Virtual Clinical Excursions from any PC or MAC with an internet connection. NEW! Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results.

Virtual Clinical Excursions Pacific View Regional Hospital is a groundbreaking workbook/CD-ROM package that brings learning to life in a "virtual" hospital setting. This guided learning experience features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the virtual hospital as they care for patients in the virtual hospital to help students make connections between what they experience through the CD-ROM and what they've learned in their textbook. Each virtual hospital visit allows the student to access realistic information resources essential to patient care resulting in a true-to-life, hands-on learning experience. Real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes over 250 NCLEX-RN examination-style questions based on the VCE patients that offer built-in testing of clinical knowledge. The virtual hospital gives students the opportunity to monitor and care for six unique patients/cases, each of whom has complex medical-surgical conditions. The online testing program includes more than 250 NCLEX-style questions for each patient, allowing instructors to assess and measure students' understanding and clinical judgment for each case. Each workbook activity includes time icons showing how long it should take the average student to complete the exercise and linkage icons to indicate that a previous activity must be completed before attempting the one at hand. Augments knowledge of physical assessment by allowing the student to examine and document vital signs, as well as assess information related to the head and neck, chest, back and spine, upper extremities, abdomen, pelvic, and lower extremities. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. Offers students the opportunity to monitor and care for one or more patients during three 45-minute periods of care within a 12-hour shift. Clinical Alerts highlight changes in the patient's condition within these 45-minute periods. A Time Icon appears under each lesson, indicating how much time it will take the student to complete the activity. Includes 6 unique new patients/cases, each with complex conditions for students to care for and monitor within the virtual hospital. A new Medication Room that introduces students to a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. A medication administration feature enables users to select, prepare, and administer medications, reinforcing the precepts of safe medication in a harm-free environment. Over 50 common medication errors imbedded within the software to boost clinical realism and prepare students for current practice. Greater faculty support with the addition of the Fac Pac, a new instructors' website, and a radically expanded testing component. A drug guide provides complete drug monographs for all medications used within the program.

Accompanying CD-ROM contains ... "case studies including 40 patient cases, disorder overviews, and interactive activities; glossary of terms and definitions organized alphabetically and by chapter; patient and family instruction guides in English and Spanish for printing and distributing to patients."--Page 4 of cover.
