This report explores how modified adjusted gross income (MAGI) is defined differently across health programs such as Medicare, the health insurance exchanges under the Affordable Care Act (ACA), and Medicaid. It also discusses why MAGI is used, and how it is applied, specific to each program. The report covers that MAGI is used to determine (1) penalty amounts owed if a person does not comply with the individual mandate or whether an individual is exempt from the individual mandate; (2) eligibility for and the amount of a premium credit to purchase coverage through a health insurance exchange; and (3) Medicaid income eligibility for certain populations.

A deduction is an amount that an applicant or client can subtract from their gross income to get their adjusted gross income. A deduction is based off of the U.S. Tax Code, and the adjusted gross income is used to help determine whether they qualify for Modified Adjusted Gross Income-based Medical Assistance (Medicaid and Child Health Plan Plus (CHP+)), tax credits, or other help purchasing health insurance.

Taxation is a must in any country as this is how the nation survives. Under the U.S. system, citizens are allowed to reduce their taxable income for both business and individual expenditures. This action is known as deduction. Businesses selling goods decrease gross income directly by the cost of goods sold. In addition, businesses may subtract most types of expenses incurred in the business. Individuals too are also allowed to benefit from tax deductions and credits. Some of these deductions are subject to restrictions and there are certain eligibility criteria that are necessary to get these deductions. Many of these deductions help to put some extra cash in the pockets of individuals' and businesses alike. Here is a list of deductions and credits.
