In 1863 black communities owned less than 1 percent of total U.S. wealth. Today that number has barely budged. Mehrsa Baradaran pursues this wealth gap by focusing on black banks. She challenges the myth that black banking is the solution to the racial wealth gap and argues that black communities can never accumulate wealth in a segregated economy.

Based on detailed research and consultation with experts, including the Bank of England, this book

Provides an original interpretation of the debate on banking and the nature of money in Keynes' time from a post-Keynesian point of view. Realfonzo (economics, U. of Naples) traces the pre- history of monetary circuit theory and its challenge to mainstream analysis in the first four decades of the century, contrasting the neoclassical approach with the monetary theory of production. He examines the contributions of both well-known and relatively neglected authors to the debate on the nature of money and function of the banks. Each chapter concludes with extensive notes.
