Yasmin Hossain makes natural dye from garden plants. She uses it to dye beautiful silk and wool fabrics. And I believe that grow-your-own dyes from garden plants is a trend that will grow enormously in popularity in the next few years. It's creative and almost anyone can do it, although there's a certain amount of experimentation involved.

Two hundred and sixty-eight recipes for natural dyes are fully tested and proportioned for practical home preparation

"'Harvesting Color' presents the entire process of infusing your life with color--finding the right plants, harvesting them at the best time, transforming the crop into beautiful dye, and, finally, marring pigment to fiber. In this beautiful book, Rebecca Burgess showcases three dozen common plants that yield striking hues. Citing fascinating botanical lore, she demystifies the process of recognizing each plant in the wild. For those you can grow yourself, she details when to sow the seed and how to nurture the plant. For all the plants, you'll learn the optimal time to harvest, as well as how to extract the best dyes" --Cover flap.

Though he didn't realize it at the time, David Lee began this book twenty-five years ago as he was hiking in the mountains outside Kuala Lumpur. Surrounded by the wonders of the jungle, Lee found his attention drawn to one plant in particular, a species of fern whose electric blue leaves shimmered amidst the surrounding green. The evolutionary wonder of the fern's extravagant beauty filled Lee with awe—and set him on a career-long journey to understand everything about plant colors. Nature's Palette is the fully ripened fruit of that journey—a highly illustrated, immensely entertaining exploration of the science of plant color. Beginning with potent reminders of how deeply interwoven plant colors are with human life and culture—from the shifting hues that told early humans when fruits and vegetables were edible to the indigo dyes that signified royalty for later generations—Lee moves easily through details of pigments, the evolution of color perception, the nature of light, and dozens of other topics. Through a narrative peppered with anecdotes of a life spent pursuing botanical knowledge around the world, he reveals the profound ways that efforts to understand and exploit plant color have influenced every sphere of human life, from organic chemistry to Renaissance painting to the highly lucrative orchid trade. Lavishly illustrated and packed with remarkable details sure to delight gardeners and naturalists alike, Nature's Palette will enchant anyone who's ever wondered about red roses and blue violets—or green thumbs.

A beautiful book of seasonal projects for using the brilliant spectrum of colors derived from plants to naturally dye your clothing and home textiles. Organized by season, Natural Color is a beautifully photographed guide to the full range of plant dyes available, drawn from commonly found fruits, flowers, trees, and herbs, with accompanying projects. Using sustainable methods and artisanal techniques, designer, artist, and professor Sasha Duerr details achievable ways to apply these limitless color possibilities to your home and wardrobe. Whether you are new to dyeing or more practiced, Duerr's clear and simple ingredients lists, step-by-step instructions, and detailed breakouts on techniques such as shibori, dip-dye, and block printing will ensure beautiful results. With recipes to dye everything from dresses and sweaters to rugs and napkins, Natural Color will inspire fashion enthusiasts, home decorators, textile lovers, and everyone else who wants to bring more color into their life.

Renowned natural dyer, artist, and educator Sasha Duerr envisions a new age of fresh, modern color palettes, drawing from our original source of inspiration and ingredients—the natural world around us. This innovative plant-based color-guide includes twenty-five palettes with five hundred natural color swatches, providing inspiration for sustainable fashion, textiles, fine art, floral design, food, medicine, gardening, interior design, and other creative disciplines. Bring the healing power of forest bathing into your home with a palette of spruce cones, pine needles, and balsam branches. Move past Pantone and embrace the natural balance of a pollinator palette with Hopi sunflower, red poppy, echinacea, and scabiosa. Duerr complements the palettes with short essays that provide useful information. She connects the colors with particular landscapes, the restorative qualities of medicinal plants, common garden flora, lifestyle experiences, food and floral waste, and the ecological benefits of using organic materials to create colors. You may never view color—or your plants—the same way again.

An exploration and appreciation of the brilliant spectrum of colors derived from plants, with seasonal, project-based ideas for using these natural dyes to color your clothing and home. Following the incredible success of the slow food movement, the slow fashion trend is now gaining momentum, with more and more consumers buying locally produced clothing and homewares created using sustainable methods and artisanal techniques. Natural Color explores the full spectrum of seasonal plant dyes, using nature as a color library. Unlike its competitors, Natural Color is structured by season, not plant, focusing on achievable projects with easy-to-follow recipes for dyeing everything from dresses, scarves, and hats to rugs, napkins, and table runners, ensuring that even the most savvy home decorator will be inspired.

The comprehensive recipe section gives instructions for over 100 colours, using both traditional dyes such as cochineal, indigo, madder and weld, and dyes from more common plants such as blackberry, rhubarb, oak and walnut.

* A chemical and botanical investigation into dyes from natural sources used through history * This book explores the many uses and the environmentally safe application of natural dye From plants to insects, natural dyes have been used since before recorded history. This book examines the possibilities offered by natural dyes, such as staining and fabric patterning. This work focuses on the sources of dyes that can grow wild in Finland, or are suitable for cultivation in the southern regions. The reader is presented with color dyes from different sources and provides guidance for dyeing and textile painting. Traditionally connected to small-scale craftsmanship, natural dyes can now take advantage of industrial-scale production. This book discusses the wide range of natural properties of dyes substances, as well as their environmental friendliness and UV protection.

Valuable hints from a veteran botanist and weaver on dyeing fibers and fabrics, what soap plants to use for cleaning textiles, advice on fragrant plants to scent and protect fabrics, plant materials to use as tools, suggestions for planning and creating a garden featuring cotton, flax, indigo, and much more. Includes an abundance of illustrations.
