Review have analyzed the North Carolina EOG Test, and this book provides the most up-to-date, thoroughly researched practice possible. The test is broken down into its individual skills to familiarize students with the test's structure, while increasing their overall skill level. Get Results TPR knows what it takes to succeed in the classroom and on tests. This book includes strategies that are proven to improve student performance. TPR provides:

- Content review, detailed lessons, and practice exercises modeled after the skills tested by the EOG test
- Proven test-taking skills and techniques such as paragraph labeling and outlining drafts
- 2 complete practice North Carolina EOG reading tests

In response to legislation passed by the 1989 North Carolina General Assembly, the State Board of Education developed and initially implemented End-of-Grade Tests (EOG) for grades 3 through 8 in the areas of reading and mathematics effective with the 1992-93 school year. These curriculum-based multiple-choice achievement tests are specifically aligned to the North Carolina Standard Course of Study and include a variety of strategies to measure the academic performance of North Carolina students. North Carolina State Board of Education for each grade are organized into four strands: (1) number sense, numeration, and numerical operations; (2) spatial sense, measurement, and geometry; (3) patterns, relationships, and functions; and (4) data, probability, and statistics. The mathematics EOG tests are administered in two parts: Calculator Inactive and Calculator Active. Students are not allowed to use calculators during the Calculator Inactive part of the test. Students are allowed to use calculators during the Calculator Active part of the test. Both parts of the test require students to interpret information from problems in context in order to generate the appropriate responses to the test questions. The North Carolina End-of-Grade (EOG) Test-Reading Comprehension assesses reading by having students read both literary and informational selections and then answer questions related to the selections. Knowledge of vocabulary is assessed indirectly through application and understanding of terms within the context of the selections and questions.

Matches the New North Carolina Standard Course of Study Introduced in 2017! Complete Preparation for the EOG Mathematics Assessments - Provides 12 practice sets for ongoing test preparation and skill development - Covers all the skills assessed on the EOG Mathematics tests - Prepares students for the question types found on the state tests - Additional more advanced questions ensure thorough skill development - Full answer key lists the skill assessed by each question Provides Ongoing Skill Development and Practice - 4 warm-up practice sets develop skills and ease students into test
