Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. This text introduces nursing students to the cognitive skills, or thought processes, required of professional nurses. Using a practical approach and a nursing process framework throughout, the book provides a bridge between the theory and the application of these skills. Cognitive skills are presented in a competency-based, clinically oriented format, with emphasis on teaching critical thinking. Chapters end with a workbook section, to provide students with real-world applications of what they have learned. Case studies and checklists throughout aid the student in applying content. The book is written at an accessible reading level.

Written specifically for the experienced nurse enrolled in an RN-to-BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared nurse to tackle serious issues in care delivery with a high level of self-awareness and skill. Leadership and Management Competence in Nursing Practice relies on a keen understanding of what experienced nurses already bring to the classroom. This text provides a core framework and useful skills and strategies to successfully lead nursing and healthcare forward. Clear, concise chapters cover leadership skills and personal attributes of leaders with minimal repetition of material covered in associate's degree programs. Content builds on the framework of AACN Essentials of Baccalaureate Education, IOM Competencies, and QSEN KSAs. Each chapter presents case scenarios to promote critical thinking and decision-making. Self-assessment tools featured throughout the text enable nurses to evaluate their current strengths, areas for growth, and learning needs.
