In today's globalized world, viable and reliable research is fundamental for the development of information. Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science. Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced-level students, researchers, and academicians seeking current research on transformative methods of research within information science.

The growing presence of digital technologies has caused significant changes in the protection of digital rights. With the ubiquity of these modern technologies, there is an increasing need for advanced media and rights protection. Media Law, Ethics, and Policy in the Digital Age is a key resource on the challenges, opportunities, issues, controversies, and contradictions of digital technologies in relation to media law and ethics and examines occurrences in different socio-political and economic realities. Highlighting multidisciplinary studies on cybercrime, invasion of privacy, and muckraking, this publication is an ideal reference source for policymakers, academicians, researchers, advanced-level students, government officials, and active media practitioners.

Knowledge management (KM) is probably the first major management trend to identify information and its management as a crucial element in the success of an organization. In order for information professionals to participate fully in KM initiatives, or to be able to take advantage of the concept to improve the effective application of their skills, both the professionals and management need a good understanding of the KM approach and the information related roles within that framework. This book focuses on the potential role of the information professional in the KM environment and, using plenty of case studies, considers: the knowledge context - creating knowledge based environments in a range of sectors powering information: the role of information skills in KM. Readership: This book will make topical reading not only for those seeking career development through KM but for all information professionals wondering exactly what it is and how it will affect their work. LIS graduates and postgraduates will also be potential readers. Published in association with TFPL Ltd TFPL Ltd have been researching KM since 1996 and have monitored developments in Europe and the USA. They have recently completed an international research project looking at the skills required for the successful implementation of knowledge management.

Africa encompasses a wide range of market conditions, from rapidly emerging economies to countries with a long history with financial markets. Produced in partnership with the African Securities Exchanges Association, this collection of essays includes the perspectives of authors in local markets who provide their analysis of the history, current developments, and future outlook for South Africa, Nigeria, Mauritius, Ghana, Zimbabwe, Morocco, Egypt, Botswana, and East Africa. For prospective investors, the book provides valuable insights on how changing regulation, evolving financial technology, and expanding investor access are transforming local markets on the continent.

"This book investigates the blockchain technology, its adoption and effectiveness in banking and other industry, and in general, for IoT based applications"--
