In May 1993 the British Mountaineering Council met to discuss the future of high altitude tourism. Of concern to attendees were reports of queues on Everest and reference was made to mountaineer Peter Boardman calling Everest an "amphitheater of the ego". Issues raised included environmental and social responsibility and regulations to minimize impacts. In the years that have followed there has been a surge of interest in climbing Everest, with one day in 2012 seeing 234 climbers reach the summit. Participation in mountaineering tourism has surely escalated beyond the imagination of those who attended the meeting 20 years ago. This book provides a critical and comprehensive analysis of all pertinent aspects and issues related to the development and the management of the growth area of mountaineering tourism. By doing so it explores the meaning of adventure and special reference to mountain-based adventure, the delivering of adventure experience and adventure learning and education. It further introduces examples of settings (alpine environments) where a general management framework could be applied as a baseline approach in mountaineering tourism development. Along with this general management framework, the book draws evidence from case studies

derived from various mountaineering tourism development contexts worldwide, to highlight the diversity and uniqueness of management approaches, policies and practices. Written by leading academics from a range of disciplinary backgrounds, this insightful book will provide students, researchers and academics with a better understanding of the unique aspects of tourism management and development of this growing form of adventure tourism across the world.

Adventure tourism is a new, rapidly growing area at both practical and academic levels. Written at an introductory level, Adventure Tourism provides a basic background and covers commercial adventure tourism products across a range of adventure tourism sectors.

[CLICK HERE](#) to download the chapter "The Alpine Environment" from Alpine Climbing * For climbers who know the basics and are ready to venture at higher altitudes * Written by longtime guides and climbing instructors certified by the American Mountain Guide Association (AMGA) * Recommended by the AMGA * Teaches situational thinking and learning as well as technique This intermediate-level guide addresses tools, skills, and techniques used in alpine terrain including rock, snow, ice, and glaciers at moderate altitude -- approximately 5000 meters (16,000 feet) and lower. The technical protection systems are covered, of course. But 30 years of alpine climbing experience has convinced the authors that mastery -- and safety -- lie in the far more difficult task of knowing exactly which techniques to use, where and when. Therefore, they teach step-by-step decision-making skills, providing scenarios, checklists, and self-posed questions to inform the decision process. Alpine Climbing assumes some prior

knowledge, primarily in rock climbing skills and techniques. Basic knots, belaying, rappelling, building rock anchors, leading, placing rock protection, and movement skills on rock: variations of these skills that are of particular value in the alpine environment are addressed in this book.

"Oceania: A Tourism Handbook draws together a wide range of sources to provide a comprehensive handbook of tourism in the Oceania region. As tourism continues to grow in importance and significance for the countries of Oceania, it is important to have a single source of information and reference for tourism. At the same time, it is vital to provide a disciplined analysis of tourism by standardising terminologies and delivering a consistency of approach for all the countries in the region." "The handbook provides an anatomy of tourism in the region by taking a detailed look at each of the three key constituents of Oceania - Australia, New Zealand and the Pacific Islands. For each of these regions, tourism demand, supply and organisation have been analysed, as well as a chapter to guide the reader through the tourism statistics sources that are available. The final section of the handbook takes a thematic approach with chapters examining key issues of tourism in the region, including investment, air transport, risk management, land ownership, climate change and tourism education."--BOOK JACKET.

Read Book Nz Mountain Guides Association

Provocative, stirring, and beautifully co-written by novelist Laurence Fearnley, Lydia Bradey: *Going Up is Easy* is the story of how one woman took on the mountaineering world and won. In 1988, Lydia Bradey became the first woman to climb Mount Everest without supplementary oxygen. She made the ascent alone and to date she is the only New Zealander to have made an oxygen-free ascent. Her climb was a truly remarkable achievement but also an internationally controversial one. *Going Up is Easy* details for the first time the events surrounding Bradey's historic feat, as well as her many hair-raising expeditions through Alaska, Bhutan, Nepal, Pakistan, India, China, Europe, and New Zealand. In the spirit of John Krakauer's *Into Thin Air* or Joe Simpson's *Touching the Void*, *Going Up is Easy* celebrates a life lived on the edge. Through her stories, we encounter a woman propelled by curiosity and passion to become one of the greatest female high-altitude adventurers of recent times. Co-written with acclaimed novelist Laurence Fearnley, a long-time friend of Bradey, and stunningly illustrated throughout, *Going Up is Easy* is a life story by turns dramatic, tender, funny, frank and inspiring. Lydia Bradey is one of Australasia's foremost high-altitude mountaineers. Beginning her alpine career in the 1970s, she made her first ascent of Aoraki/Mount Cook while still a teenager. Following her dream to become a climber, she travelled to Alaska, Nepal, Bhutan and Pakistan, where, in 1987, she became the first Australasian woman to climb an 8000-metre peak, Gasherbrum 2. In 1988, she made a historic ascent of Mount Everest, becoming the first woman to reach the summit without supplementary oxygen. Employed as a professional mountain guide, she has made two further ascents of Everest as well as climbed

and guided extensively throughout Nepal, Pakistan, Antarctica, South America, Africa and Europe. She lives at Lake Hawea, Otago, with her partner [\[link\]](#) and fellow mountain guide [\[link\]](#) Dean Staples. Also available as an eBook

Managing Tourist Health is a seminal study which combines a range of state of the art reviews of the issues facing tourism managers and professionals in the fast growing area of tourist health and safety. An international range of contributors, each a specialist in their chosen field, have written papers for this book to explain many of the complex issues affecting tourists, the tourism industry and governments in ensuring tourism is viewed as a safe and enjoyable experience for all. The contributors have a wealth of interdisciplinary experience ranging from medicine, law, tourism research, safety science, ergonomics, management, consultancy among other cognate areas of study. Future research directions are examined in many of the chapters together with current state of the art knowledge in relation to key studies. The editors have worked in this area of research since the late 1980s and have accumulated a wide range of academic, professional and consultancy experience for governments and the private sector. The book extends this understanding through a multi-disciplinary perspective combining some of the leading researchers who have published in this area since the emergence of tourist health as a legitimate area of study in the 1970s.

This is a key reference guide for the exploration of leisure and outdoor recreation. It reflects the multidisciplinary nature of these fields and contextualizes the leading research and knowledge on key concepts, theories and practices. Edited by leading authorities in the field, this volume
