Absolute clarity is the aim with a new generation of revision guide for the 2020s. This guide has been expertly compiled and edited by successful former teachers of Computer Science, highly experienced examiners and a good dollop of scientific research into what makes revision most effective. Past examinations questions are essential to good preparation, improving understanding and confidence. This guide has combined revision with tips and more practice questions than you could shake a stick at. All the essential ingredients for getting a grade you can be really proud of. Each specification topic has been referenced and distilled into the key points to make in an examination for top marks. Questions on all topics assessing knowledge, application and analysis are all specifically and carefully devised throughout this book.

A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

Succeeding in the Biomedical Admissions Test is a comprehensive guide that provides prospective applicants with the information necessary to achieve the desired results on the BMAT, including practice questions and a full mock exam.

AQA approved. Develop your students' scientific thinking and practical skills within a more rigorous curriculum; differentiated practice questions, progress tracking, mathematical support and assessment preparation will consolidate understanding and develop key skills to ensure progression. - Builds scientific thinking, analysis and evaluation skills with dedicated Working Scientifically tasks and support for the 8 required practicals, along with extra activities for broader learning - Supports students of all abilities with plenty of scaffolded and differentiated Test Yourself Questions, Show You Can challenges, Chapter review Questions and synoptic practice Questions - Supports Foundation and Higher tier students, with Higher tier-only content clearly marked - Builds Literacy skills for the new specification with key words highlighted and practice extended answer writing and spelling/vocabulary tests

This text engages every student and stimulates their interest in science. It provides a simple and clear approach to all resources available, with all the help and support you need to teach the new specifications with ease and make the transition as smooth as possible.

These new resources have been written to match the 2016 OCR GCSE Gateway Science (9-1) specifications. Built-in assessment and differentiation supports students of all abilities and makes progress tracking easy. Maths skills and practical skills are developed throughout with ramped practice questions and differentiated learning outcomes.
