A companion series to our "Competitive Mathematics for Gifted Students," the series "Math Challenges for Gifted Students" offers additional material in practice test form. The workbooks are useful for assessment and for development of testing skills. In full color and with fully detailed solutions, the workbooks may be used as a fun introduction to competitive problem solving. However, the problems are a bit more difficult than actual Kangaroo problems, exploring a large number of known 'tips and tricks.' One could say it is much more concentrated in that, unlike actual exams, it has less 'filler' - almost every problem is 'tricky' and embodies a specific strategy. The material is excellent for training purposes and has been used by the authors in seminars with hundreds of the most gifted students in the Bay Area. The workbook contains six 24-question tests. After each test there is an answer key. The tests are followed by detailed solutions. The recommended time limit for each test is of 75 minutes. Students who have not been exposed to competitive problem solving will find this book extremely difficult and will need help from an adult. Without preparation, students who get 'A' in school generally score about 50 points out of 96 possible on Kangaroo level 1-2.

This book is for anyone who wishes to illustrate their mathematical ideas, which in our experience means everyone. It is organized by material, rather than by subject area, and purposefully emphasizes the process of creating things, including discussions of failures that occurred along the way. As a result, the reader can learn from the experiences of those who came before, and will be inspired to create their own illustrations. Topics illustrated within include prime numbers, fractals, the Klein bottle, Borromean rings, tilings, space-filling curves, knot theory, billiards, complex dynamics, algebraic surfaces, groups and prime ideals, the Riemann zeta function, quadratic fields, hyperbolic space, and hyperbolic 3-manifolds. Everyone who opens this book should find a type of mathematics with which they identify. Each contributor explains the mathematics behind their illustration at an accessible level, so that all readers can appreciate the beauty of both the object itself and the mathematics behind it.

A comprehensive and rigorous introduction for graduate students and researchers, with applications in sequential decision-making problems.

This book contains almost 600 unusual and challenging multiple-choice problems designed for students aged 11-15. The first part consists of past papers (1988SH93) for the annual UK Schools Mathematical Challenge. The second part contains forty-two short papers of ten questions each in the same style, and are designed to fill a thirty-minute class or homework slot. This collection of unusual, high quality problems will provide an invaluable resource for all mathematics teachers.

"This workbook will help your child perform multiple-digit vertical form multiplication."--Cover.

Teaching mathematics to a range of learners has always been challenging. With the widespread use of inclusion and RTI, having a variety of effective teaching options for students who struggle is more important than ever. In My Kids Can, you'll get instructional strategies that allow all struggling math learners to move along the path toward grade-level competency. In My Kids Can teachers share successful ways to work with struggling students. Their instruction is aligned with the NCTM standards and guided by five powerful core principles. Make mathematical thinking explicit. Link assessment and teaching. Build understanding through talk. Expect students to take responsibility for their own learning and support them as they do. Work collaboratively with special education staff to plan effective instruction. These teachers describe how they use whole-group, small-group, and individual instruction as well as other strategies that hold kids to high expectations while scaffolding content and processes across the math curriculum. In addition, an accompanying DVD presents classroom footage of their teaching and includes the language, dialogue, and teaching moves you'll adapt for success with your students. The DVD also contains teacher interviews that answer difficult questions of practice. Best of all, with professional learning questions and video analyses, My Kids Can is great for individuals, teacher study groups, staff development, and preservice courses. Help every child grow as a mathematician. Trust your fellow teachers for instruction that works. Read My Kids Can and use its proven-effective strategies and its professional supports to build on your students' strengths and address their learning needs.

This is the Teacher's Edition of Alif Baa, Third Edition. It includes the text, accompanying DVD, and the answer key all bound in to one book. Request a Desk/Exam copy here. The best-selling Alif Baa is the first volume of the Al-Kitaab Arabic language program and is now available in a new third edition. In this new version of the introduction to Arabic letters and sounds, English-speaking students will find an innovative integration of colloquial and formal (spoken and written) Arabic. Together, the book and new companion website provide learners with all the material necessary to learn the sounds of Arabic, write its letters, and begin speaking Arabic, including interactive, self-correcting exercises to enhance learning. The companion website also gives instructors additional online grading options. FEATURES • Four-color design throughout the book features over 100 illustrations and photographs • Gives learners and instructors color-coded options for the variety of language they wish to learn in speaking: Egyptian, Levantine, or formal Arabic (MSA) • Introduces over 200 basic vocabulary words in all three forms of spoken and written Arabic side by side, including expressions for polite social interaction, and activates them in interactive homework exercises and classroom groupwork • Includes video dialogues in Egyptian and Levantine, filmed in Cairo and Damascus • Includes video footage of an Arabic calligrapher, capsules on Arabic culture, and images of street signs from Morocco, Egypt, and Lebanon • Includes new English-Arabic and Arabic-English glossaries, searchable in the companion website • Textbook includes a convenient DVD with the basic audio and video materials (no interactive exercises) for offline study that will play in iTunes and compatible MP3 players • New companion website (sold separately) -- [alkitaabtextbook.com](http://alkitaabtextbook.com) -- features a fully integrated set of interactive exercises with all the video and audio materials and additional online course management and grading options for teachers Alif Baa provides the essential first 20-25 contact (classroom) hours of the Al-Kitaab program, accompanied by 40-50 homework hours. Students who complete Alif Baa should reach a novice-intermediate to novice-high level of proficiency.

A companion series to our "Competitive Mathematics for Gifted Students," the series "Math Challenges for Gifted Students" offers additional material in practice test form. The workbooks are useful for assessment and for development of testing skills. In full color and with fully explained solutions, the workbooks may be used as a fun introduction to problem solving. The workbook contains six 30-question tests. After each test, there is an answer key. The tests are followed by detailed solutions that outline various problem solving strategies appropriate for the respective age. The recommended time limit for each test is of 75 minutes.
