This book focuses exclusively on control of interfacial properties and structures for semiconductor device applications from the point of view of improving and developing novel electrical properties. The following

Download Ebook Pbte Past Papers 2nd Year

topics are covered metal-semiconductors, semiconductor hetero-interfaces, characterization, semiconducting new materials, insulator-semiconductor, interfaces in device, control of interface formation, control of interface properties, contact metallization. A variety of up-to-date research topics such as atomic layer epitaxy, atomic layer passivation, atomic scale characterization including STM and SR techniques, single ion implementation, self-organization crystal growth, in situ measurements for process control and extremely high-spatial resolution analysis techniques, are also included. Furthermore it bridges the macroscopic, mesoscopic, and atomic-scale regimes of semiconductor interfaces, describing the state of the art in forming, controlling and characterizing unique

Download Ebook Pbte Past Papers 2nd Year

semiconductor interfaces, which will be of practical importance in advanced devices. Intended for both technologists who require an up-to-date assessment of methods for interface formation, processing and characterization, and solid state researchers who desire the latest developments in understanding the basic mechanisms of interface physics, chemistry and electronics, this book will be a welcome addition to the existing literature.
