~~Packed with simple and practical ideas, this is a "must read" if you want to "up" your game in today's world. Peer-Mentoring is a powerful technique for achieving success in a focused, target and accelerated way. Using clearly defined separate goals, two individuals form a mutual "Support for Success" contract to achieve real results in any category of Life (Career, Health, Personal). If you want to increase your productivity, enhance your earning power, achieve your goals, and reach more overall success in your life (whether measured in money, expertise, or relationships), then read on. Peer Mentoring(TM) is a system in which two people agree to support each other based on complementary skills and needs, and the partners create a 'contract.' The purpose of this process is to create a productively paired 'buddy system' to help both of you achieve your individual goals. There have been numerous books and articles about mentoring, finding someone senior to you in your field who will help, advise, consult, and coach you to realize your potential. Having a mentor (if you can find one) can definitely be an asset to you and your career. Lately, we hear a lot about the power of networking in all its formats, such as 'live' networking - going to events, collecting business cards, and then following up on those contacts. Of course, we also have cyber networking thanks to Facebook, Twitter, and the most business-related platform, LinkedIn. The end goal - is finding the contacts who will be helpful to you or your business. Peer Mentoring is a combination or confluence of these two trends (networking and mentoring), regardless of the business or career you're engaged in. I first discovered the idea of Peer Mentoring when I began using it for myself. I met another woman consultant who had many of the skills, experiences, and contacts that I lacked. I had some of the resources and talents she needed. We formed a contract with each other in which we made very clear statements of our separate goals, and then we made clear written commitments to support each other in achieving those goals. Some of this support came from teaching each other the skills the other needed, sharing our contacts, educating each other in areas where we needed more information, and, most importantly, just knowing that we each had a buddy rooting for us. We called it a "loving kick in the can't's". Our mutual support system was so effective that we found that we had each achieved our one-year goals after only a few months. During this period, we met once a week, reviewed our short-term and long-term goals, discussed how effectively we were spending our time, and took turns instructing each other on subjects in which one of us wanted more knowledge. We were so amazed by our success that we decided to teach this process to others. Now, thousands of people all over the country have learned the process and are actively forming Peer-Mentor pairs to help each other to be more successful. Peer Mentoring is a process through which people identify their own resources and those of others and then create specific strategies for mutual goal achievement. It is a new adaptation of the age-old concept of reciprocity practiced by all cultures. Usual reciprocal practices are implicit, whereas the Peer-Mentor contract makes the agreements explicit. This model encourages the development and organization of one's readily available resources - personal, business, and social - and is based on mutual support. It is different from the "I can do it myself through gritted teeth" attitude, which I believe most people find extremely difficult in practice. The Peer-Mentoring technique challenges the myth that isolation is a necessary companion of success.~~

~~This book explores what mentoring is and what are the essential skills required for it to be effective. Based on research, a new model is introduced - distal mentoring - which embodies best practice and can mitigate negative outcomes. Illustrated with relevant scenarios and mentoring tips, this book is a development tool for active practitioners, and expresses the mentoring process by emphasising its fundamental applications. This is reinforced by case studies and supporting theory, delivering a practical yet digestible medium. Following an initial exploration of the nature of mentoring, key techniques such as deep listening skills, empathy and powerful questioning are examined. Along with developing the relationship through empathy, emotional intelligence and rapport building, this book provides a comprehensive text in its introduction of mentoring as well as its recommendation of best practice.~~

~~Whether or not a college currently offers a Supplemental Instruction program, uses peer leaders in First-year Learning Community, or assigns Peer Tutors to courses, Undergraduate Peer Mentoring Programs will provide educators with concepts, examples, and findings useful for program development, innovation and enhancement. Contributors describe an international and interdisciplinary set of programs from the perspectives of program administrators, instructors, students and teaching assistants, while the editor reviews four decades of research, incorporating examples into theory and practice sections.~~

~~Peer mentoring is an increasingly popular criminal justice intervention in custodial and community settings. Peer mentors are community members, often with lived experiences of criminal justice, who work or volunteer to help people in rehabilitative settings. Despite the growth of peer mentoring internationally, remarkably little research has been done in this field. This book offers the first in-depth analysis of peer mentoring in criminal justice. Drawing upon a rigorous ethnographic study of multiple community organisations in England, it identifies key features of criminal justice peer mentoring. Findings result from interviews with people delivering and using services and observations of practice. Peer Mentoring in Criminal Justice reveals a diverse practice, which can involve one-to-one sessions, group work or more informal leisure activities. Despite diversity, five dominant themes are uncovered. These include Identity, which is deployed to inspire change and elevate knowledge based on lived experiences; Agency, or a sense of self-direction, which emerges through dialogue between peers; Values or core conditions, including caring, listening and taking small steps; Change, which can be a terrifying and difficult struggle, yet can be mediated by mentors; and Power, which is at play within mentoring relationships and within the organisations, contexts and ideologies that surround peer mentoring. Peer mentoring offers mentors a practical opportunity to develop confidence, skills and hope for the future, whilst offering inspiration, care, empathy and practical support to others. Written in a clear and direct style this book will appeal to students and scholars in criminology, sociology, cultural studies, social theory and those interested in learning about the social effects of peer mentoring.~~

~~Whatever stage of the peer mentoring journey your students are at, this engagingly-written book will help them to get the most out of their peer mentoring experience. It explains the role of peer mentors in universities and shows students exactly what's involved in providing academic and pastoral support to other students. The book also contains a helpful trouble-shooting chapter, packed with supportive guidance on dealing with challenging scenarios. The final chapters of the book prompt students to reflect on the skills they have developed through peer mentoring, and help them to articulate these skills to prospective employers. This book will be an essential companion for both aspiring and current student mentors, and an invaluable reference point for staff involved in facilitating peer mentoring schemes.~~

~~This is a comprehensive resource for creating, refining and sustaining effective student peer mentoring programs. While providing a blueprint for successfully designing programs for a wide range of audiences - from freshmen to doctoral students - it also offers specific guidance on developing programs targeting three large groups of under-served students: first-generation students, international students and student veterans. This book is primarily intended as a resource for student affairs professionals and program coordinators who are developing new peer-mentoring programs or considering refining existing ones. It may also serve as a text in courses designed to train future peer mentors and leaders.~~

~~All the world's criminal justice systems need to undertake direct work with people who have come into their care or are under their supervision as a result of criminal offences. Typically, this is organized in penal and correctional services - in custody in prisons, or in the community, supervised by services such as probation. Bringing together international experts, this book is the go-to source for students, researchers, and practitioners in criminal justice, looking for a comprehensive and authoritative summary of available knowledge in the field. Covering a variety of contexts, settings, needs, and approaches, and drawing on theory and practice, this Companion brings together over 90 entries, offering readers concise and definitive overviews of a range of key contemporary issues on working with offenders. The book is split into thematic sections and includes coverage of: Theories and models for working with offenders Policy contexts of offender supervision and rehabilitation Direct work with offenders Control, surveillance, and practice Resettlement Application to specific groups, including female offenders, young offenders, families, and ethnic minorities Application to specific needs and contexts, such as substance misuse, mental health, violence, and risk assessment Practitioner and offender perspectives The development of an evidence base This book is an essential and flexible resource for researchers and practitioners alike and is an authoritative guide for students taking courses on working with offenders, criminal justice policy, probation, prisons, penology, and community corrections.~~

~~The primary thrust of the proposed volume is to provide information for higher education minority serving institutions (MSIs) and other institutions and individuals interested in providing and/or improving mentoring programs and services to a variety of target groups. The editors are interested in how mentorship can produce beneficial outcomes for the mentor that may be similar to or different from outcomes in other educational contexts. Thus, the purpose of this volume is to showcase, through case studies and other forms of empirical research, how successful mentoring programs and relationships at MSIs have been designed and implemented. Additionally, we will examine the various definitions and slight variations of the meaning of the construct of mentoring within the MSI context. It is our intent to share aspects of mentoring programs and relationships as well as their outcomes that have heretofore been underrepresented and underreported in the research literature.~~
