Planning for Your Own Death – Legal Affairs

In palliative care we aim to provide good symptom control and ultimately a good death. Patients and their families need time to prepare for death. Sometimes acute situations arise that can interfere with this process, leading to a distressing and undignified end. Decision making in emergency situations is difficult.

Planning for a good death: responding to unexpected events

Unless a person has died in hospital or outside the home, confirmation of death is the first major practical issue to be addressed following a suspected death. When a person dies in hospital, medical staff will be available to confirm the death and sign the certificate recording the causes of death and events will proceed from there.

Collection

A comprehensive approach to prevention, intervention, and postvention concerning death, violence, and self-destructive behavior among school-aged children in educational settings.

When the end of life makes its inevitable appearance, people should be able to expect reliable, humane, and effective caregiving. Yet too many dying people suffer unnecessarily. While an "overtreated" dying is feared, untreated pain or emotional abandonment are equally frightening. Approaching Death reflects a wide-ranging effort to understand what we know about care at

the end of life, what we have yet to learn, and what we know but do not adequately apply. It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care. This volume offers a profile of when, where, and how Americans die. It examines the dimensions of caring at the end of life: Determining diagnosis and prognosis and communicating these to patient and family. Establishing clinical and personal goals. Matching physical, psychological, spiritual, and practical care strategies to the patient's values and circumstances. Approaching Death considers the dying experience in hospitals, nursing homes, and other settings and the role of interdisciplinary teams and managed care. It offers perspectives on quality measurement and improvement, the role
