classroom environment,
for those attempting to
learn SAS, and for quick
and useful reference.

The SAS documentation
comes in many
volumes, and several are
thousands of pages long.
This makes for a very
difficult challenge when
getting started with
SAS. This volume spans
several levels of
econometrics. It is

suitable for undergraduate students who will use "canned" SAS statistical procedures, and for graduate students who will use advanced procedures as well as direct programming in SAS's matrix language, discussed in chapter appendices. Material within the chapters is accessible to
