Announcing a new Myers/DeWall text, created specifically for the Fall 2019 AP® course framework! You are likely familiar with the name Dr. David G. Myers. Now, he and his new co-author, Nathan DeWall, bring you a book that will allow you to use College Board's new Personal Progress Checks and Dashboard more effectively. This updated edition includes 100% of the new course content in the new nine-unit structure. All teacher and student resources will also be updated to correlate to the new student edition; this includes the TE, TRFD, TB, Strive, and LaunchPad. Everything will publish in summer 2020 such that you can use this new program for Fall 2020 classes. If you're not familiar with Myers/DeWall texts, you are in for a treat! Drs. Myers and DeWall share a passion for the teaching of psychological science through wit, humor, and the telling of poignant personal stories (individually identified in the text by the use of each author's initials [DM and ND]). Through close collaboration, these authors produce a unified voice that will teach, illuminate, and inspire your AP® students.

This edition has been revised to introduce a more flexible structure for the teaching and studying of social psychology and includes up-to-date, international research in the area.

WARNING: This is not the actual book Psychology Textbook 10th Edition by David G. Myers. Do not buy this Summary, Review & Analysis if you are looking for a full copy of this great book.Our expert educators have already read Psychology and pulled out the key points, and insights to give you a comprehensive chapter-by-chapter summary & review. In doing so, unfortunately we do not have the space to include all of the many important ideas and anecdotes found in Psychology. To get it all, you should first order the full book. Packaged together in an engaging and easily digestible format, this concise summary & review works best as an unofficial guide or companion to read alongside the book. PSYCHOLOGY TEXTBOOK 10TH EDITION: BY DAVID G. MYERS – SUMMARY, REVIEW & STUDY GUIDEThis Summary, Review & Study Guide is your companion to the 10th edition of the bestselling textbook Psychology, written by David G. Myers. It consolidates the material in the textbook, providing students with a handy way to preview material before class, to reinforce content after lectures, or to review prior to exams, saving valuable time while increasing comprehension.This guide follows the structure of Myers' text, providing helpful, comprehensive summaries for each of the book's 16 chapters. Beginning with a one-paragraph overview of the chapter's main themes, summaries contain ample headnotes that provide the student with an easy-to-follow outline for quick material review. In addition to summarizing the material, the guide references psychology's famous scientists and important research results, as well as the important historical and statistical information included in the textbook. The guide also identifies the as-yet unanswered questions within the field. Following each chapter summary is a concise bullet list of the key take-away ideas for the chapter, as well as two or more review questions, with answers, to assist with thoughtful and thorough studying and test prep. Technical language, an important aspect to understanding psychology (and therefore usually on the exam!), is italicized and defined for easy review. When it makes sense to do so, vocabulary is italicized within running text; in other chapters, vocabulary is listed (dictionary-style) and defined. The guide also includes graphs and graphics for concepts such as Erickson's stages of psychosocial development and Weber's law that are more easily understood and retained visually. Like all introductory textbooks, Psychology covers a lot of material, and because the material is scientific in nature, some of it can be difficult to understand and assimilate. A study guide is a helpful choice for college students, who are always pressed for time, to enhance comprehension. Although designed specifically to accompany Myers' textbook, this study guide would also be a useful companion for other psychology textbooks or for someone wanting a good basic review of psychology's concepts and terms. FROM START-TO-FINISH IN JUST 30 MINUTES!Here's your chapter-by-chapter guide to David G. Myers's Psychology that you can start and finish right now!

This new edition continues the story of psychology with added research and enhanced content from the most dynamic areas of the field--cognition, gender and diversity studies, neuroscience and more, while at the same time using the most effective teaching approaches and learning tools.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose.
