### **Chapter 9 Radiation Safety Study Guide. Flashcards | Quizlet**

Radiation Safety Sample Questions 1. Radiation level of 560 Sv/Hr is measured at a distance of 16 feet from an Ir-192 source. How much additional distance has to be moved to get only 2 mR/Hr.  $560 \text{ Sv} = 56 \text{ mR}$ .  $I_1 d_1 = I_2 d_2$ .  $d_2 = 56 \times 16 \times 16 = 7168$  Total distance at which radiation will be 2 mR =  $d_2 = 7168 = 85 \text{ ft}$ . approx. So additional distance to be moved =  $85 - 16 = 69 \text{ ft}$ .

\*\*\*Includes Practice Test Questions\*\*\* Secrets of the Radiation Health and Safety Exam helps you ace the Radiation Health and Safety Exam, without weeks and months of endless studying. Our comprehensive Secrets of the Radiation Health and Safety Exam study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. Secrets of the Radiation Health and Safety Exam includes: The 5 Secret Keys to DANB Exam Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review including: Make

Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; A comprehensive Radiation Health and Safety review including: Radiographic Findings, Bitewing Radiographs, Periapical Radiographs, Panoramic Radiographs, Bisect-the-Angle Technique, Sizes of Film, Anatomical Landmarks, Radiolucent, Intensifying Screens, Lateral Skull Projection, X-ray Measurement, Personnel Monitoring, Shadow Casting, Automatic Processing, Inverse Square Law, Roentgen, Tissue Sensitivity, ALARA, Dosimeter, Composition of Film, Fixing, Emulsion Defects, Mounting Radiographs, and much more...

Reinforce your understanding of radiation therapy and prepare for the Registry exam! Mosby's Radiation Therapy Study Guide and Exam Review is both a study companion for Principles and Practice of Radiation Therapy, by Charles Washington and Dennis Leaver, and a superior review for the certification exam offered by the American Registry for Radiologic Technology (ARRT). An easy-to-read format simplifies study by presenting information in concise bullets and tables. Over 1,000 review questions are included. Written by radiation therapy expert Leia Levy, with contributions by other radiation therapy educators and clinicians, this study tool provides everything you need to prepare for the ARRT Radiation Therapy Certification Exam. This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Over 1000 multiple-choice questions in Registry format are provided in the text, allowing you to both study and simulate the actual exam experience. Focus questions and key information in tables make it easy to find and remember information for the exam. Review exercises reinforce learning with a variety of question formats to fit different learning styles. Questions are organized by ARRT content categories and are available in study mode with immediate feedback after each question, or in exam mode, which simulates the test-taking experience in a timed environment with ARRT exam-style questions.

Now in its second edition, this popular text remains a comprehensive study and review aid for the radiation oncology trainee and practicing radiation oncologist. The updated Radiation Oncology Study Guide, 2e maintains its robust Q&A format, and has been comprehensively updated to include the latest staging information and treatment methods. Answer rationales have been modified to a more readable, high yield bulleted format. Each chapter covers a major disease site and is divided into two main parts: Questions & Answers and Rationale. Questions review the scope of clinical practice, spanning from initial presentation to complications of treatment. General content and work-up questions emphasize "pearls" of epidemiology, anatomy, pathology, clinical presentation, and staging. Treatment content questions not only review evidence-based data guiding treatment recommendations, but also practical aspects of radiation treatment planning, pertinent radiobiology and physics, and complications of treatment. This book is an ideal resource for physicians-in-training to prepare for initial written and oral exams and physicians in practice to maintain their skills and prepare for maintenance of certification longitudinal and written exams.

Radiation Health and Safety Exam Practice Questions are the simplest way to prepare for the Radiation Health and Safety test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Our Radiation Health and Safety Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our Radiation Health and Safety Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.
