With over sixty cases as support, this text presents the philosophy of law as a perpetual series of debates with overlapping lines and cross connections. Using law as a focus to bring into relief many social and political issues of pressing importance in contemporary society, this book encourages readers to think critically and philosophically. Classic Readings and Cases in the Philosophy of Law centers on five major questions: What is law? What, if any, connection must there be between law and morality? When should law be used to restrict the liberty of individuals? To what extent should democratic states permit civil disobedience? What, if anything, justifies the infliction of punishment on those who violate the law? The extensive anthology of cases covers the mundane to the grandest of constitutional issues, including controversial topics like ownership of genetic material, capital punishment, and gay rights. Brief

PHILOSOPHICAL PROBLEMS IN THE LAW is the perfect introduction to the philosophy of law. This collection of articles and cases helps you consider philosophical problems associated with the law through examples, case studies, and decision scenarios. Case examples and recent decisions such as *Boumediene v. Bush* (rights of Guantanamo detainees) and *Brown v. Entertainment Merchants Association* (freedom of expression and violent video games) coupled with new readings help you see the real-world relevance of what you are learning.

This is a collection of Canadian legal decisions, primarily from the Supreme Court of Canada, along with international cases that have

bearing on Canadian law. The selected cases raise and respond to current and controversial issues in political and legal philosophy. Cases have been edited to present key legal principles and methods of judicial reasoning in action, showing not only what was decided but also how the decisions were made. Topics include: constitutional law, fundamental freedoms, equality rights, civil and criminal responsibility, and sovereignty. This new fifth edition adds over two dozen new cases, including new sections on Indigenous issues and international law. A helpful glossary of common legal terms has also been added as an appendix.

the conceptual foundations of space-time theory. Tim Maudlin's broad historical overview examines Aristotelian and Newtonian accounts of space and time, and traces how Galileo's conceptions of relativity and space-time led to Einstein's special and general theories of relativity. Maudlin explains special relativity with enough detail to solve concrete physical problems while presenting general relativity in more qualitative terms. Additional topics include the Twins Paradox, the physical aspects of the Lorentz-FitzGerald contraction, the constancy of the speed of light, time travel, the direction of time, and more. Introduces nonphysicists to the philosophical foundations of space-time theory Provides a broad historical overview, from Aristotle to Einstein Explains special relativity geometrically, emphasizing the intrinsic structure of space-time Covers the Twins Paradox, Galilean relativity, time travel, and
