2015 Third Edition. The ninety-five Home Health nursing care plans and plan of care forms in this book cover every nursing diagnosis and care plan problem that may be generated from the OASIS-C form for the nursing plan of care. Also includes Pain Care manual. Terminology is based on OASIS-C language and nursing diagnosis definitions and classifications as outlined by the North American Nursing Diagnosis Association (NANDA). The home health nursing care plan format follows the care plan standards from the American Nurses Association. The first section of the book covers regulations and standards for nursing care plans, Home Health Nursing care plan components, and Quality Measures and Outcome Measures. Because the terminology of the home health nursing care plan is based on OASIS-C language, it is very easy to see which care plans and plan of care forms are triggered by the OASIS-C entries. The home health nursing care plans can be used to supplement the nursing plan of care, and are also extremely useful for teaching patients and caregivers. All of the home health nursing care plans and nursing plan of care forms in the book are also on the CD. When the CD is placed in a computer, the care plans can be opened in a word processor. Entries can be added or deleted to individualize home health nursing care plans.

The purpose of restorative care nursing is to take an active role in helping older adults maintain their highest level of function, thus preventing excess disability. This book was written to help formal and informal caregivers and administrators at all levels to understand the basic philosophy of restorative care, and be able to develop and implement successful restorative care programs. The book provides a complete 6-week education program in restorative care for caregivers, many suggestions for suitable activities, and practical strategies for motivating both older adults and caregivers to engage in restorative care. In addition, the book provides an overview of the requirements for restorative care across all settings, the necessary documentation, and ways in which to complete that documentation.

This cutting-edge book on geriatric care management is designed to meet a growing area that spans across the continuum of health care, and is the essential reference for the geriatric care management profession. It gives health care delivery systems, private and public health care practitioners, business people, and schools of nursing, social work, and related health care fields the definitive book on geriatric care management. Handbook of Geriatric Care Management defines the work of the geriatric care manager. It offers an overview of what geriatric care management is, defines duties and procedures, and specifies the organizations that use a geriatric care manager. It provides guidelines for setting up a geriatric care management practice independently or as part of a larger health care delivery system or business, and contains key elements for marketing the practice. Several case studies are included.

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.
