The contributions to this Festschrift, honouring the distinguished Irish musicologist Harry White on his sixtieth birthday, have wide repercussions and span a broad timeframe. But for all its variety, this volume is built around two axes: on the one hand, attention is focussed on the history of music and literature in Ireland and the British Isles, and on the other, topics of the German and Austrian musical past. In both cases it reflects the particular interest of a scholar, whose playful, sometimes unconventional way of approaching his subject is so refreshing and time and again leads to innovative, surprising insights. It also reflects a scholar, who   for all the broadening of his perspectives that has taken place over the years   has always adhered to the strands of his scholarly preoccupations that have become dear to him: the music of the 'Austro-Italian Baroque', and Irish musical culture first and foremost. An international cast of authors announces the sustaining influence of Harry White's wide-ranging research. Professor Dr Thomas Hochradner Chair of the Department of Musicology University of Music and Dramatic Arts Mozarteum Salzburg

Methods in Educational Research Methods in Educational Research is designed to prepare students for the real world of educational research. It focuses on scientifically-based methods, school accountability, and the professional demands of the twenty-first century, empowering researchers to take an active role in conducting research in their classrooms, districts, and the greater educational community. Like the first edition, this edition helps students, educators, and researchers develop a broad and deep understanding of research methodologies. It includes substantial new content on the impact of No Child Left Behind legislation, school reform, quantitative and qualitative methodologies, logic modeling, action research, and other areas. Special features to assist the teaching and learning processes include vignettes illustrating research tied to practice, suggested readings at the end of each chapter, and discussion questions to reinforce chapter content. Praise for the Previous Edition "A new attempt to make this subject more relevant and appealing to students. Most striking is how useful this book is because it is really grounded in educational research. It is very well written and quite relevant for educational researchers or for the student hoping to become one." -PyscCRITIQUES/American Psychological Association "I applaud the authors for their attempt to cover a wide range of material. The straightforward language of the book helps make the material understandable for readers." -Journal of MultiDisciplinary Evaluation

Offers valuable support to teachers preparing students for ABRSM Practical exams. Includes recordings of all practical exercises.

This is a comprehensive approach to music from the point of view of anthropology. The author maintains that ethnomusicology, by definition, must not divorce the sound-analysis of music from its cultural context of people thinking, acting, and creating.

(Music Sales America). The ultimate compact reference book of theory and harmony. Contains essential, basic information relating to all aspects of music rudiments, counterpoint, harmony and orchestration. An excellent guide for both amateur, and professional musicians.

Taking your ABRSM Music Theory exam can be nerve wracking and nerves can prevent you doing your best in any exam. Good preparation and planning is always the answer to this problem.
