Sample Rubric For Social Studies Research Paper

Latest US news, world news, sports, business, opinion, analysis and reviews from the Guardian, the world's leading liberal voice

An intersectional history of the shared struggle for African American and Latinx civil rights Spanning more than two hundred years, An African American and Latinx History of the United States is a revolutionary, politically charged narrative history, arguing that the “Global South” was crucial to the development of America as we know it. Scholar and activist Paul Ortiz challenges the notion of westward progress as exalted by widely taught formulations like “manifest destiny” and “Jacksonian democracy,” and shows how placing African American, Latinx, and Indigenous voices unapologetically front and center transforms US history into one of the working class organizing against imperialism. Drawing on rich narratives and primary source documents, Ortiz links racial segregation in the Southwest and the rise and violent fall of a powerful tradition of Mexican labor organizing in the twentieth century, to May 1, 2006, known as International Workers’ Day, when migrant laborers–Chicana/os, Afrocubanos, and immigrants from every continent on earth–united in resistance on the first “Day Without Immigrants.” As African American civil rights activists fought Jim Crow laws and Mexican labor organizers warred against the suffocating grip of capitalism, Black and Spanish-language newspapers, abolitionists, and Latin American revolutionaries coalesced around movements built between people from the United States and people from Central America and the Caribbean. In stark contrast to the resurgence of “America First” rhetoric, Black and Latinx intellectuals and organizers today have historically urged the United States to build bridges of solidarity with the nations of the Americas. Incisive and timely, this bottom-up history, told from the interconnected vantage points of Latinx and African Americans, reveals the radically different ways that people of the diaspora have addressed issues still plaguing the United States today, and it offers a way forward in the continued struggle for universal civil rights. 2018 Winner of the PEN Oakland/Josephine Miles Literary Award

This volume explores the scientific frontiers and leading edges of research across the fields of anthropology, economics, political science, psychology, sociology, history, business, education, geography, law, and psychiatry, as well as the newer, more specialized areas of artificial intelligence, child development, cognitive science, communications, demography, linguistics, and management and decision science. It includes recommendations concerning new resources, facilities, and programs that may be needed over the next several years to ensure rapid progress and provide a high level of returns to basic research.

The author of the world wide best-seller, Small Is Beautiful, now tackles the subject of Man, the World, and the Meaning of Living. Schumacher writes about man's relation to the world. man has obligations -- to other men, to the earth, to progress and technology, but most importantly himself. If man can fulfill these obligations, then and only then can he enjoy a real relationship with the world, then and only then can he know the meaning of living. Schumacher says we need maps: a "map of knowledge" and a "map of living." The concern of the mapmaker--in this instance, Schumacher--is to find for everything it's proper place. Things out of place tend to get lost; they become invisible and there proper places end to be filled by other things that ought not be there at all and therefore serve to mislead. A Guide for the Perplexed teaches us to be our own map makers. This constantly surprising, always stimulating book will be welcomed by a large audience, including the many new fans who believe strongly in what Schumacher has to say.

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

A research proposal is a plan that a candidate submits to gain approval for post-graduate research. Although it is a typical requirement for any research in higher education, it has failed to receive the attention it deserves from the academic community as a procedure of systematic teaching and learning. This book provides a support framework with step-by-step guidance about what constitutes a good research proposal and what can be done to maximize one’s chances of writing a successful application. It also presents advice and practical activities to enhance skill development, and shows how success is within reach if we are willing to face our flaws and grasp how to use the available information productively and persuasively.

There is No Such Thing as a Natural Disaster is the first comprehensive critical book on the catastrophic impact of Hurricane Katrina on New Orleans. The disaster will go down on record as one of the worst in American history, not least because of the government's inept and cavalier response. But it is also a huge story for other reasons; the impact of the hurricane was uneven, and race and class were deeply implicated in the unevenness. Hartman and. Squires assemble two dozen critical scholars and activists who present a multifaceted portrait of the social implications of the disaster. The book covers the response to the disaster and the roles that race and class played, its impact on housing and redevelopment, the historical context of urban disasters in America and the future of economic development in the region. It offers strategic guidance for key actors - government agencies, financial institutions, neighbourhood organizations - in efforts to rebuild shattered communities.

Nearly every major challenge the United States facesâ€"from alleviating unemployment to protecting itself from terrorismâ€"requires understanding the causes and consequences of people's behavior. Even societal challenges that at first glance appear to be issues only of medicine or engineering or computer science have social and behavioral components. Having a fundamental understanding of how people and societies behave, why they respond the way they do, what they find important, what they believe or value, and what and how they think about others is critical for the country's well-being in today's shrinking global world. The diverse disciplines of the social, behavioral, and economic (SBE) sciences â€•anthropology, archaeology, demography, economics, geography, linguistics, neuroscience, political science, psychology, sociology, and statisticsâ€•all produce fundamental knowledge, methods, and tools that provide a greater understanding of people and how they live. The Value of Social, Behavioral, and Economic Sciences to National Priorities evaluates whether the federal government should fund SBE research at the National Science Foundation (NSF), and, specifically, whether SBE research furthers the mission of the NSF to advance national priorities in the areas of health, prosperity and welfare, national defense, and progress in science; advances the missions of other federal agencies; and advances business and industry, and to provide examples of such research. This report identifies priorities for NSF investment in the SBE sciences and important considerations for the NSF for strategic planning.

Everything parents need to help their kids succeed in social studies The only comprehensive social studies skill-building series available, the Get Ready! For Social Studies series equips proactive parents with the tools they need to help their children develop the core skills required to perform at grade level in social studies-related subjects.
