Political humor and satire are, perhaps, as old as comedy itself, and they are crucial to our society and our collective sense of self. Satire is confrontational. It's about pushback, dissent, discord, disappointment, and demonstrating the absurdity of the status quo. This book is an attempt to explore how these aspects of satire help secure our sanity. Aristotle famously said that humans are naturally political animals. We need political community to flourish and live good lives. But politics also entails unpopular decisions, oppression, and power struggles. Satire is a vehicle through which we reflect on and challenge the irrational, incomprehensible, and intolerable nature of our lives without becoming totally despondent or depressed. In a poignant, pithy, but not ponderous manner, Al Gini and Abraham Singer delve into the history of satire to rejoice in its triumphs and watch its development from ancient graffiti to the latest late-night TV talk show.

Ever since 1759, when Voltaire wrote "Candide" in ridicule of the notion that this is the best of all possible worlds, this world has been a gayer place for readers. Voltaire wrote it in three days, and five or six generations have found that its laughter does not grow old. "Candide" has not aged. Yet how different the book would have looked if Voltaire had written it a hundred and fifty years later than 1759. It would have been, among other things, a book of sights and sounds. A modern writer would have tried to catch and fix in words some of those Atlantic changes which broke the Atlantic monotony of that voyage from Cadiz to Buenos Ayres. When Martin and Candide were sailing the length of the Mediterranean we should have had a contrast between naked scarped Balearic cliffs and headlands of Calabria in their mists. We should have had quarter distances, far horizons, the altering silhouettes of an Ionian island.

Colored birds would have filled Paraguay with their silver or acid cries. Dr. Pangloss, to prove the existence of design in the universe, says that noses were made to carry spectacles, and so we have spectacles. A modern satirist would not try to paint with Voltaire's quick brush the doctrine that he wanted to expose. And he would choose a more complicated doctrine than Dr. Pangloss's optimism, would study it more closely, feel his destructive way about it with a more learned and caressing malice. His attack, stealthier, more flexible and more patient than Voltaire's, would call upon us, especially when his learning got a little out of control, to be more than patient. Now and then he would bore us. "Candide" never bored anybody except William Wordsworth. Voltaire's men and women point his case against optimism by starting high and falling low. A modern could not go about it after this fashion. He would not plunge his people into an unfamiliar misery. He would just keep them in the misery they were born to.

In his first book of Satires, written in the late, violent days of the Roman republic, Horace exposes satiric speech as a tool of power and domination. Using critical theories from classics, speech act theory, and others, Catherine Schlegel argues that Horace's acute poetic observation of hostile speech provides insights into the operations of verbal control that are relevant to his time and to ours. She demonstrates that though Horace is forced by his political circumstances to develop a new, unthreatening style of satire, his poems contain a challenge to our most profound habits of violence, hierarchy, and domination. Focusing on the relationships between speaker and audience and between old and new style, Schlegel examines the internal conflicts of a notoriously difficult text. This exciting contribution to the field of Horatian studies will be of interest to classicists as well as other scholars interested in the genre of satire.

This work examines what happens when comedy becomes political, and politics become funny. A series of original essays focus on a range of programmes, from 'The Daily Show' to 'South Park'.
