SweetTree Home Care Services has been established to provide Service Users with the highest quality domiciliary care and support possible to facilitate people living in their own homes with dignity, independence and control over how they live their lives.

Answers questions, gives choices and shows how to implement decisions.

This third edition of Community Care Practice and the Law has been substantially rewritten and restructured to reflect the rapid legal and policy changes affecting the community care field. It provides comprehensive and jargon-free explanations of both community care legislation and other areas of the law directly relevant to practitioners. Topics covered include: • assessment and eligibility criteria (' fair access to care') and waiting times • placing people in care homes • non-residential, domiciliary and home care services • carers' assessments and services • home adaptations and disabled facilities grants • direct payments • continuing health care and health services generally, including community equipment services • joint working between local authorities and the NHS • single assessment process, intermediate care • decision making capacity and incapacity • information sharing • adult protection • human rights and disability discrimination • health and safety at work legislation including manual handling people subject to immigration control, including asylum seekers care standards. Numerous examples of legal cases and ombudsman investigations clearly illustrate the practical impact of legislation on community care. A separate chapter provides an at-a-glance view of the whole range of legislation underpinning the everyday work of practitioners. The author also identifies the underlying mechanisms, tensions and problems affecting community care law and practice. Primarily covering England in detail, much of the legal case law covered and the legal principles involved are of general relevance across the United Kingdom, and where material is not directly applicable to Wales, Scotland and Northern Ireland, short summaries offer general pointers for the position in these three countries. This book is an essential guide for practitioners and managers in both the statutory and voluntary sectors, policy makers in local and central government, advocates, lawyers and social work students.

A practical understanding of the law is essential for all those involved in the manual handling of adults and children (as patients, clients or pupils), whether in 'hands-on', managing, commissioning or advisory roles. To this end, Manual Handling in Health and Social Care presents an accessible overview of manual handling legislation, legal case law, national guidance, policy and practice. Applicable primarily to England, Scotland and Wales, it covers both employee safety under the Manual Handling Operations Regulations and wider health and safety at work legislation, and also patient and client entitlement under community care, NHS and human rights legislation. A stand-alone overview of manual handling law and practice is followed by more in-depth material, in A-Z format and fully cross-referenced, which allows the reader to look up issues for quick access to further information. In particular, it contains an extensive collection of case law relevant to health and social care and digested in summary form. Topics include rehabilitation, risk assessment, care plans, equipment provision, documentation of decisions and cumulative strain injury. Addressing the tensions sometimes existing between the health and safety of employees, the needs and wishes of service users and limited resources, this book provides professionals, managers, front-line staff and legal advisers with an understanding of law as a useful and practical tool to assist in solutions to manual handling problems.

Does mum have to sell her house? Can I give my house to the children? My friend can't manage at home, how do I help her choose a care home? What help can I get in the house? How do I get help from Social Services? My father has had a stroke and can't sign a cheque, how can I pay his home fees? My partner will get my savings when I die, won't he? These and many other questions are asked by older people and, as importantly, those close to them, whether family, friends or neighbours, when faced with making decisions for those in later life. In Preparing Ahead Colin Ashley addresses many of the legal, financial and practical issues which often need to be faced as we, or those for whom we care, get older. The book emphasises the benefits of finding out well in advance what it is that we do not know and of taking simple steps which will eventually reduce the trauma often associated with advancing years.

The Care Standards Act 2000, which came into force on April 1, 2002, substantially reforms the law relating to the registration and regulation of residential care homes and other establishments. This book provides an in-depth guide to the new Act and offers practical advice as to its wide-reaching effect.

Finding the coding and billing information you need just got easier. The Coders ' Dictionary & Reference Guide is the perfect companion for coding and billing students and busy professionals.
