Meetings are a crucial part of all our lives, but too often they go nowhere and waste valuable time. In Six Thinking Hats, Edward de Bono shows how meetings can be transformed to produce quick, decisive results every time. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles fundamentally change the way you work and interact. They have been adopted by businesses and governments around the world to end conflict and confusion in favour of harmony and productivity.

Edward de Bono's Six Thinking Hats is the groundbreaking psychology manual that has inspired organisations and individuals all over the world. De Bono's innovative guide divides the process of thinking into six parts, symbolized by the six hats, and shows how the hats can dramatically transform the effectiveness of meetings and discussions. This is a book to open your mind, unleash your creativity and change the way you think about thinking.

The internationally bestselling guide to better thinking used by tens of thousands of people - fully revised and updated.

THE MULTI-MILLION COPY BESTSELLING PHENOMENON Do you regularly find yourself in long, unstructured meetings which end without a decision? Are you a team leader looking for tips on increasing productivity? Or are you looking for ways to enhance collaboration? Six Thinking Hats, Edward de Bono's classic book on meetings, remains as relevant as ever. Used to huge success by big companies and organisations such as IBM, Siemens and NASA, the Six-Hats method is a proven way to: - Reduce meeting length to one quarter of what they were previously - Make decisions in just 15 minutes, rather than 3 hours - Increase productivity by nearly 500% This extremely simple tool not only increases efficiency in discussions and decision-making, but also encourages openness and trust among colleagues, resulting in happier team, a rise in productivity, and decisions which almost make themselves. 'An inspiring man with brilliant ideas. De Bono never ceases to amaze' Sir Richard Branson

This book is open access under a CC BY-NC 3.0 IGO license. This book comprehensively covers topics in knowledge management and competence in strategy development, management techniques, collaboration mechanisms, knowledge sharing and learning, as well as knowledge capture and storage. Presented in accessible "chunks," it includes more than 120 topics that are essential to high-performance organizations. The extensive use of quotes by respected experts juxtaposed with relevant research to counterpoint or lend weight to key concepts; "cheat sheets" that simplify access and reference to individual articles; as well as the grouping of many of these topics under recurrent themes make this book unique. In addition, it provides scalable tried-and-tested tools, method and approaches for improved organizational effectiveness. The research included is particularly useful to knowledge workers engaged in executive leadership, research, analysis and advice; and corporate management and administration. It is a valuable resource for those working in the public, private and third sectors, both in industrialized and developing countries.

The second edition of a bestseller, *Safety Differently: Human Factors for a New Era* is a complete update of *Ten Questions About Human Error: A New View of Human Factors and System Safety*. Today, the unrelenting pace of technology change and growth of complexity calls for a different kind of safety thinking. Automation and new technologies have resu

Coaching is proving to be one of the most popular and most effective techniques in the field of learning and development. Managers are constantly being reminded that coaching is an important part of their role in getting the best from staff, while trainers are increasingly being called upon to coach individuals in a variety of aspects of both work and life. This one-stop book aims to provide everything readers need to be able to harness this technique. Part 1 of the book provides a detailed and clearly structured step-by-step approach, which should help anyone to develop their ability to coach others. Importantly however, as well as helping to develop the skills of coaching, the authors provide valuable guidance on: where to start when coaching a colleague; how long the coaching will take; and which methods should be employed and when. Part 2 provides a range of real-life case studies from a variety of commercial and non-commercial settings that will help you to decide how coaching can best be tailored to your own organization. The final part of the book contains detailed practical exercises that can be used in a variety of settings. Each of these individual elements combine to provide the definitive coaching handbook.

Together these tapes & accompanying guidebooks present a structured approach to thinking & problem solving. Uses "hats" to symbolize the roles we play as thinkers & assigns a color to each that represents a code for the various modes of thought. White Hat stands for the objective, "just the facts" mode; Red Hat for feelings; Yellow Hat for positive, "thumbs-up" approach; Green Hat for creativity; Black Hat for the critical approach; & Blue Hat for the control that directs our thinking. The program will be useful to anyone who has to run a meeting or work with a problem-solving group.

Attention is a key part of thinking clearly and productively, and yet we pay very little attention to attention itself. If you see someone lying injured in the middle of the road, for example, your attention would go to that person but, if a bright pink dog wandered past at the same time, your attention would automatically stray to the dog. That is precisely the weakness of attention - it is pulled to the unusual. How much attention do we pay to the usual? So, what can we do about it? Instead of waiting for attention to be pulled towards something unusual, we can set out frameworks for 'directing' our attention in a conscious manner. Just as we can decide to look north, west or even south-east, so we can set up a framework for directing our attention, and that's where Edward de Bono's 'six frames' come in. Each frame is a direction or method in/with which to look, based on a different shape - triangle, circle, heart, square, diamond, slab. Today we are literally surrounded by information and it has never been so easy to obtain. Yet, information itself is not enough; it's how we look at it that really counts. Using the 'six frames' technique is the key to extracting real value from the masses of facts and figures out there and, like all de Bono's techniques, it is simple, effective and will utterly change the way you interpret information.
