According to McIntosh, apocalypse will come upon us so slowly, we won't realize what's happening until it is perhaps too late to survive, much like the story of the frog in a pot of cold water with the heat gradually turned up to boiling -- the change is so incremental the frog, who would have jumpe

Soft Apocalypse by Will McIntosh - Goodreads

Soft Apocalypse by Will McIntosh, which is based on a previously published short story by McIntosh, is a very frightening book about the end of civilization as we know it. The most frightening aspect of the book is that this apocalypse is precipitated not by environmental or science-gone-wrong scenarios, but by an economic collapse and succeeding depression and then the social chaos that follows.

In the end, each member of the tribe must decide what to give up in order to survive. The novel, expanded from a short story, shows some unevenness in tone, but McIntosh strongly delineates his characters and makes Jasper's struggles very affecting. Though it may be soft, this apocalypse has plenty of sharp edges. (Apr.) (c) Copyright PWxyz, LLC.

Posted on January 17, 2012 by Stefan (Far Beyond Reality) This review of Will McIntosh's first novel Soft Apocalypse originally appeared on Tor.com. Will's second novel is due out later this month, so I thought I'd revisit his debut. My review of Will's sophomore effort Hitchers will follow in a few days. McIntosh projects the future of Soft Apocalypse in a thoroughly realistic fashion, and although world events occur relatively tangential to Jasper - they don't really affect him as much as local ones like the Wal-Mart closing, but then, how many of us**** feel like the tragedies in Japan or New Zealand, or the regime change in Egypt and the unrest in Libya, really have an impact on our lives? Most Americans wouldn't even know something was happening in Libya if it wasn't making it ...

Soft Apocalypse is one of those novels that is, for whatever reason, quite critically under-read; despite a warm reception from critics upon publication, I've rarely seen it discussed. In the future, love is complicated and death is not necessarily the end. Love Minus Eighty follows several interconnected people in a disquieting vision of romantic life in the century to come. There's Rob, who accidentally kills a jogger, then sacrifices all to visit her in a cryogenic dating facility, seeking forgiveness but instead falling in love. Veronika, a shy dating coach, finds herself coaching the very woman who is stealing the man she loves. And Mira, a gay woman accidentally placed in a heterosexual dating center near its inception, desperately seeks a way to reunite with her frozen partner as the years pass. In this daring and big-hearted novel based on the Hugo-winning short story, the lovelorn navigate a world in which technology has reached the outer limits of morality and romance.

A new epic of alien invasion and human resistance by Hugo Award-winning author Will McIntosh. The invaders came to claim earth as their own, overwhelming us with superior weapons and the ability to read our minds like open books. Our only chance for survival was to engineer a new race of perfect soldiers to combat them. Seventeen feet tall, knowing and loving nothing but war, their minds closed to the aliens. But these saviors could never be our servants. And what is done cannot be undone.

For fans of The Maze Runner and The Fifth Wave, this debut YA novel from Hugo Award winner Will McIntosh pits four underprivileged teens against an evil billionaire in the race of a lifetime. No one knows where the brilliant-colored spheres came from. One day they were just there, hidden all over the earth like huge gemstones. Burn a pair and they make you a little better: an inch taller, skilled at math, better-looking. The rarer the sphere, the greater the improvement--and the more expensive the sphere. Sully is a sphere dealer at a flea market. It doesn't pay much--Alex Holliday's stores have muscled out most of the independent sellers--but it helps him and his mom make the rent. When Sully meets Hunter, a girl with a natural talent for finding spheres, the two start searching together. One day they find a Gold--a color no one has ever seen. There's no question the Gold is priceless, but what does it actually do? None of them is aware of it yet, but the fate of the world rests on this little golden orb. Because all the world fights over the spheres, but no one knows where they come from, what their powers are, or why they're here. PRAISE: "Burning Midnight is for (1) adrenaline junkies and gamers, (2) obsessive collectors, and (3) people who can't get enough of crazy endings. I'm all of these things, and I loved it." --Margaret Stohl, New York Times bestselling author of Black Widow: Forever Red and coauthor of the internationally bestselling Beautiful Creatures series

Faller is a new gripping standalone, science fiction thriller by Hugo Award-winning author Will McIntosh. Day One: No one can remember anything--who they are, family and friends, or even how to read. Reality has fragmented and Earth consists of an islands of rock floating in an endless sky. Food, water, electricity--gone, except for what people can find, and they can't find much. Faller's pockets contain tantalizing clues: a photo of himself and a woman he can't remember, a toy soldier with a parachute, and a mysterious map drawn in blood. With only these materials as a guide, he makes a leap of faith from the edge of the world to find the woman and set things right. He encounters other floating islands, impossible replicas of himself and others, and learns that one man hates him enough to take revenge for actions Faller can't even remember.

Thirteen-year-old twins Vick and Tara have built an incredible machine--a loyal robotic watchdog named Daisy. But, when local crime boss Ms. Alba schemes to add Daisy to her robot army, Vick and Tara must go to great lengths to protect their prized pet. Because Daisy is more than just any robot--she's their constant protector, and together the three make a great team. Vick and Tara are determined to stop the mob from tearing their little family apart. And they might just succeed! Sure, the evil Ms. Alba has more robot watchdogs, but none are as smart--or as faithful--as their Daisy. Plus, if things get too dangerous, Tara could always upgrade their pet. With her mechanical skills, she could make Daisy bigger, stronger, and a lot more intimidating! A Junior Library Guild Selection A 2019-2020 Texas Bluebonnet Award Master List Selection "Engaging, suspenseful, and with nearly all the vivid fighting confined to robots, this gritty tale is perfect for a younger audience than most post-apocalyptic stories." --Kirkus Reviews "This compelling drama with cool tech themes and bad guys getting their comeuppance is a winner." --SLJ

What happens when resources become scarce and society starts to crumble? As the competition for resources pulls America's previously stable society apart, the "New Normal" is a Soft Apocalypse. This is how our world ends; with a whimper instead of a bang. "It's so hard to believe," Colin said as we crossed the steaming, empty parking lot toward the bowling alley. "What?" "That we're poor. That we're homeless." "I know." "I mean, we have college degrees," he said. "I know," I said. There was an ancient miniature golf course choked in weeds alongside the bowling alley. The astroturf had completely rotted away in places. The

windmill had one spoke. We looked it over for a minute (both of us had once been avid mini golfers), then continued toward the door. "By the way," I added. "We're not homeless, we're nomads. Keep your labels straight." New social structures and tribal connections spring up across America, as the previous social structures begin to dissolve. Soft Apocalypse follows the journey across the South East of a tribe of formerly middle class Americans as they struggle to find a place for themselves and their children in a new, dangerous world that still carries the ghostly echoes of their previous lives.

In this terrifyingly timely tale for fans of The Eye of Minds, a teen and his group of friends find themselves on the run after using a genius lie-detector contraption to expose their corrupt government. In a Putin-esque near-future America, the gifted and talented high school has just been eliminated, and Sam and his friends have been using their unexpected free time to work on a tiny, undetectable, utterly reliable lie detector. They're all in it for the money--except Theo, their visionary. For Theo, it's about creating a better world. A BS-free world, where no one can lie, and the honest will thrive. Just when they finish the prototype and turn down an offer to sell their brainchild to a huge corporation, Theo is found dead. Greedy companies, corrupt privatized police, and even the president herself will stop at nothing to steal the Truth App. Sam sets his sights on exposing all lies and holding everyone accountable. But he and his friends quickly realize the costs of a BS-free world: the lives of loved ones, and political and economic stability. They now face a difficult question: Is the world capable of operating without lies, or are lies what hold it together? "Deserving of comparisons to The Hunger Games." --Kirkus "This compelling, action-packed story will have readers eagerly turning pages...Give to fans of Cory Doctorow's Little Brother." --SLJ "The action is nonstop from beginning to end..a BS-free way to present a deep and fundamental question." --Booklist

From the author of The Wilds, which Publishers Weekly called “a brilliant combination of emotion and grime, wit and horror,” comes a debut novel that is part dystopian satire, part Southern Gothic tall tale: a disturbing yet hilarious romp through a surreal New South where newfangled medical technologies change the structure of the human brain and genetically modified feral animals ravage the blighted landscape. Down on his luck and still pining for his ex-wife, South Carolina taxidermist Romie Futch spends his evenings drunkenly surfing the Internet before passing out on his couch. In a last-ditch attempt to pay his mortgage, he replies to an ad and becomes a research subject in an experiment conducted by the Center for Cybernetic Neuroscience in Atlanta, Georgia. After “scientists” download hifalutin humanities disciplines into their brains, Romie and his fellow guinea pigs start debating the works of Foucault and hashing out the intricacies of postmodern subjectivity. The enhanced taxidermist, who once aspired to be an artist, returns to his hometown ready to revolutionize his work and revive his failed marriage. As Romie tracks down specimens for his elaborate animatronic taxidermy dioramas, he develops an Ahab-caliber obsession with bagging “Hogzilla,” a thousand-pound feral hog that has been terrorizing Hampton County. Cruising hog-hunting websites, he learns that this lab-spawned monster possesses peculiar traits. Pulled into an absurd and murky underworld of biotech operatives, FDA agents, and environmental activists, Romie becomes entangled in the enigma of Hogzilla’s origins. Exploring the interplay between nature and culture, biology and technology, reality and art, The New and Improved Romie Futch probes the mysteries of memory and consciousness, offering a darkly comic yet heartfelt take on the contemporary human predicament.
