"SpringBoard is a world-class English Language Arts Program for students in grade 6-12. Written by teachers for teachers. SpringBoard offers proven instructional design to get students ready for the AP, the SAT, and college"--Back cover.

Paul Fisher sees the world from behind glasses so thick he looks like a bug-eyed alien. But he's not so blind that he can't see there are some very unusual things about his family's new home in Tangerine County, Florida. Where else does a sinkhole swallow the local school, fire burn underground for years, and lightning strike at the same time every day? The chaos is compounded by constant harassment from his football-star brother, and adjusting to life in Tangerine isn't easy for Paul-until he joins the soccer team at his middle school. With the help of his new teammates, Paul begins to discover what lies beneath the surface of his strange new hometown. And he also gains the courage to face up to some secrets his family has been keeping from him for far too long. In Tangerine, it seems, anything is possible.

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Designed to meet the needs of the Common Core State standards for English Language Arts. It helps students develop the knowledge and skills needed for advanced placement as well as for success in college and beyond without remediation.

"SpringBoard is a world-class English Language Arts Program for students in grade 6-12. Written by teachers for teachers. SpringBoard offers proven instructional design to get students ready for the AP, the SAT, and college"--Back cover.

A traditional Native American healer from the Karuk tribe shares his personal story of reconnection to the Great Spirit in contemporary America. • By Bobby Lake-Thom, author of the bestseller Native Healer. • Provides Native American shamanic perspective on disease and healing. • Explores indigenous social identity

in a spiritual and political context. • Reveals authentic indigenous traditions and ceremonies from numerous tribes. This redemption story of Native American healer Bobby Lake-Thom invites the reader to enter a world of authentic indigenous traditions and ceremonies. Bobby, also known as Medicine Grizzly Bear, didn't recognize his shamanic calling at first. He didn't know that his vivid dreams, psychic abilities, and visitations by wild animals and ghostly figures were calls from the Great Spirit. In the age-old shamanic tradition, it took a near-death experience for the message to get through to him. Though still a young man, he was wracked with debilitating arthritis. Unable to handle the physical and psychic pain, he set out into the wilderness determined to kill himself with an overdose of drugs and alcohol. But before downing the substances, he approximated a Native American ceremony as best he could, sending a heartfelt prayer for assistance to the Great Spirit. He woke up--alive--the next morning and received a message from Eagle, telling him to seek help from Wahsek, a medicine man in the northern mountains. And so Bobby's apprenticeship began. Forbidden to reveal Wahsek's secrets until 10 years after his death, Bobby is now free to share this fascinating story with the world.
