Draws on more than forty interviews with Steve Jobs, as well as interviews with family members, friends, competitors, and colleagues to offer a look at the co-founder and leading creative force behind the Apple computer company.

The #1 New York Times bestselling biography of how Steve Jobs became the most visionary CEO in history. Becoming Steve Jobs breaks down the conventional, one-dimensional view of Steve Jobs that he was half-genius, half-jerk from youth, an irascible and selfish leader who slighted friends and family alike. Becoming Steve Jobs answers the central question about the life and career of the Apple cofounder and CEO: How did a young man so reckless and arrogant that he was exiled from the company he founded become the most effective visionary business leader of our time, ultimately transforming the daily life of billions of people? Drawing on incredible and sometimes exclusive access, Schlender and Tetzeli tell a different story of a real human being who wrestled with his failings and learned to maximize his strengths over time. Their rich, compelling narrative is filled with stories never told before from the people who knew Jobs best, including his family, former inner circle executives, and top people at Apple, Pixar and Disney, most notably Tim Cook, Jony Ive, Eddy Cue, Ed Catmull, John Lasseter, Robert Iger and many others. In addition, Schlender knew Jobs personally for 25 years and draws upon his many interviews with him, on and off the record, in writing the book. He and Tetzeli humanize the man and explain, rather than simply describe, his behavior. Along the way, the book provides rich context about the technology revolution we've all lived through, and the ways in which Jobs changed our world. A rich and revealing account, Becoming Steve Jobs shows us how one of the most colorful and compelling figures of our times was able to combine his unchanging, relentless passion with an evolution in management style to create one of the most valuable and beloved companies on the planet.

Computer manufacturing is--after cars, energy production and illegal drugs--the largest industry in the world, and it's one of the last great success stories in American business. Accidental Empires is the trenchant, vastly readable history of that industry, focusing as much on the astoundingly odd personalities at its core--Steve Jobs, Bill Gates, Mitch Kapor, etc. and the hacker culture they spawned as it does on the remarkable technology they created. Cringely reveals the manias and foibles of these men (they are always men) with deadpan hilarity and cogently demonstrates how their neuroses have shaped the computer business. But Cringely gives us much more than high-tech voyeurism and insider gossip. From the birth of the transistor to the mid-life crisis of the computer industry, he spins a sweeping, uniquely American saga of creativity and ego that is at once uproarious, shocking and inspiring.

Revealing the real Steve Jobs, the mother of his first child paints an intimate portrait of an idealistic young man who was driven to change the world, who denied his own child and who mistook power for love. 100,000 first printing.

From the provocative and hilarious EGOT winner, bestselling author, and host of The View, Whoopi Goldberg, comes the perfect antidote to all those outdated relationship advice books in the world, weighing in on why marriage isn't for everybody, and how the life you want shouldn't be the life everyone else expects you to have. Whoopi Goldberg has been an electrifying, envelope-pushing public figure of many stripes: acclaimed actor, comedienne, singer, songwriter, author, political activist and talk show host. Now, Whoopi will speak openly about why marriage isn't for everyone, how being alone can be satisfying, and how what's most important is understanding who you are and what makes you happy. Wise, funny, and conversation-starting, Whoopi's message is sure to resonate with the millions of people who struggle with relationships every day. Goldberg says: "I get to hear from a lot of different people about relationships and this got me trying to figure out why the divorce rate is 50 high. It occurred to me that as one who has done it badly often, I might have some insight. It's hard to really know the other person's agenda, but if someone says 'you complete me'...RUN!!!"

Eddie is a wounded war veteran, an old man who has lived, in his mind, an uninspired life. His job is fixing rides at a seaside amusement park. On his 83rd birthday, a tragic accident kills him, as he tries to save a little girl from a falling cart. He awakes in the afterlife, where he learns that heaven is not a destination. It's a place where your life is explained to you by five people, some of whom you knew, others who may have been strangers. One by one, from childhood to soldier to old age, Eddie's five people revisit their connections to him on earth, illuminating the mysteries of his "meaningless" life, and revealing the haunting secret behind the eternal question: "Why was I here?"

A celebrated new musical based on the Academy Award-winning film.

"Joe Orton's last play, What the Butler Saw, will live to be accepted as a comedy classic of English literature" (Sunday Telegraph) The chase is on in this breakneck comedy of licensed insanity, from the moment when Dr Prentice, a psychoanalyst interviewing a prospective secretary, instructs her to undress. The plot of What the Butler Saw contains enough twists and turns, mishaps and changes of fortune, coincidences and lunatic logic to furnish three or four conventional comedies. But however the six characters in search of a plot lose the thread of the action - their wits or their clothes - their verbal self-possession never deserts them. Hailed as a modern comedy every bit as good as Wilde's The Importance of Being Earnest, Orton's play is regularly produced, read and studied. What the Butler Saw was Orton's final play."He is the Oscar Wilde of Welfare State gentility" (Observer)

The bestselling author of Leonardo da Vinci and Steve Jobs returns with a gripping account of how Nobel Prize winner Jennifer Doudna and her colleagues launched a revolution that will allow us to cure diseases, fend off viruses, and have healthier babies. When Jennifer Doudna was in sixth grade, she came home one day to find that her dad had left a paperback titled The Double Helix on her bed. She put it aside, thinking it was one of those detective tales she loved. When she read it on a rainy Saturday, she discovered she was right, in a way. As she sped through the pages, she became enthralled by the intense drama behind the competition to discover the code of life. Even though her high school counselor told her girls didn't become scientists, she decided she would. Driven by a passion to understand how nature works and to turn discoveries into inventions, she would help to make what the book's author, James Watson, told her was the most important biological advance since his co-discovery of the structure of DNA. She and her collaborators turned a curiosity of nature into an invention that will transform the human race: an easy-to-use tool that can edit DNA. Known as CRISPR, it opened a brave new world of medical miracles and moral questions. The development of CRISPR and the race to create vaccines for coronavirus will hasten our transition to the next great innovation revolution. The past half-century has been a digital age, based on the microchip, computer, and internet. Now we are entering a life-science revolution. Children who study digital coding will be joined by those who study genetic code. Should we use our new evolution-hacking powers to make us less susceptible to viruses? What a wonderful boon that would be! And what about preventing depression? Hmmm...Should we allow parents, if they can afford it, to enhance the height or muscles or IQ of their kids? After helping to discover CRISPR, Doudna became a leader in wrestling with these moral issues and, with her collaborator Emmanuelle Charpentier, won the Nobel Prize in 2020. Her story is a thrilling detective tale that involves the most profound wonders of nature, from the origins of life to the future of our species.

Welcome to the mind-to the world-of Fake Steve Jobs. Fake Steve the counterintuitive management guru: "Obviously we can't literally put our employees' lives at risk. But we have to make them feel that way." Fake Steve the celebrity hobnobber: "I like Bono. He's the only person I know who's more self-absorbed than I am." Options is the book that had the critics howling-with laughter: "A voice for our own digital age...Mac-slappingly funny."-Newsweek.com "Hilarious."-New York Times "There's a laugh-out-loud moment on nearly each one of the book's pages."-Wall Street Journal "Wickedly funny."-San Francisco Chronicle
