Produced in an edition of twenty five sets, signed and numbered 1 to 25 by the artist, with an additional five proof sets numbered AP1 to AP5. With a commissioned text by Bruno Latour.

Factum Arts :: The Language of Things

Language is not limited to the form of words. From the glow of a lamppost or the curve of a bench to a bird's song, we are constantly in dialogue with what theorist Walter Benjamin called "the language of things." This exhibition speaks to our innate attempts to understand and read patterns inherent in the world around us.

The Language of Things - Public Art Fund

In The Language of Things Deyan Sudjic, Director of the Design Museum, decodes the things around us: their hidden meanings, our relationship with them, how they shape our lives and why we desire them. Design is everywhere. It seduces, pleases and inspires us. It makes us part with our money. It defines who we think we are. An iPhone, an anglepoise lamp, a Picasso, a banknote, an Armani suit, a ...

Use features like bookmarks, note taking and highlighting while reading The Language of Things: Understanding the World of Desirable Objects.

The Language of Things: Understanding the World of ...

Language, as described above, is species-specific to human beings. Other members of the animal kingdom have the ability to communicate, through vocal noises or by other means, but the most important single feature characterizing human language (that is, every individual language), against every known mode of animal communication, is its infinite productivity and creativity.

Language | Definition, Types, Characteristics, & Facts ...

At last, a boo for the almost bare shelf labelled 'design criticism'. But are we any closer to a general theory of stuff, asks Justin McGuirk.

We live in a world drowning in objects. But what do they tell us about ourselves?In The Language of Things, Deyan Sudjic charts our relationship - both innocent and knowing - with all things designed. From the opulent excesses of the catwalk, or the technical brilliance of a laptop computer, to the subtle refinement of a desk lamp, he shows how we can be manipulated and seduced by our possessions. Sudjic delivers an exhilarating insider's history of design as he introduces us to the world's most original innovators and reveals the hidden meanings in their work. How did the design of a pistol influence a car? Why did a chair make a cafe the most fashionable place in Paris? What can we learn from a banknote, a police uniform or a typeface? And why can't any of us decide what size to wear our trousers? In an age when the word 'designer' has become synonymous with the cynical and manipulative, Sudjic examines the qualities behind successful design and explores the conflicting tensions between high art and mass production. Brilliant and courageous, The Language of Things defines the visual vocabulary of our time and gives us a powerful new way of seeing the world.

'Things Fall Apart' tells the story of Okonkwo, an important man in the Igbo tribe in the days when white men were first on the scene. Okonkwo becomes exiled from his tribe, as a result of his pride and his fears, with tragic consequences.

AN INSTANT NEW YORK TIMES BESTSELLER!! Named a Best Book of 2019 by TIME, Amazon, and The Washington Post A Wired Must-Read Book of Summer "Gretchen McCulloch is the internet's favorite linguist, and this book is essential reading. Reading her work is like suddenly being able to see the matrix." —Jonny Sun, author of everyone's a alien when ur a alien too Because Internet is for anyone who's ever puzzled over how to punctuate a text message or wondered where memes come from. It's the perfect book for understanding how the internet is changing the English language, why that's a good thing, and what our online interactions reveal about who we are. Language is humanity's most spectacular open-source project, and the internet is making our language change faster and in more interesting ways than ever before. Internet conversations are structured by the shape of our apps and platforms, from the grammar of status updates to the protocols of comments and replies. Linguistically inventive online communities spread new slang and jargon with dizzying speed. What's more, social media is a vast laboratory of unedited, unfiltered words where we can watch language evolve in real time. Even the most absurd-looking slang has genuine patterns behind it. Internet linguist Gretchen McCulloch explores the deep forces that shape human language and influence the way we communicate with one another. She explains how your first social internet experience influences whether you prefer "LOL" or "lol," why "sparkly tildes" succeeded where centuries of proposals for irony punctuation had failed, what emoji have in common with physical gestures, and how the artfully disarrayed language of animal memes like lolcats and doggo made them more likely to spread.

NEW EDITION!Well... it seems that these animals don't want to take their medicine! But step by step, each one discovers that taking medicine is very important for the animals, as well as for the children!A funny way to learn and a funny way to teach. As everyone knows how difficult it can be to explain to young children how important it is to take medicine. ...--THE BOOK OF THE ANIMALS:FUN LEARNING FOR CHILDREN AND PARENTSWhat are certainly the most occurring moments in a parent's life? When their child doesn't want to wash, eat, sleep, go to school, share, take medicine, get vaccinated... And what can a parent answer to these refusals?The successful "Book of The Animals" bilingual children's books series was created with the aim to help both parents and children to discover the benefits of washing, eating, sleeping, going to school, sharing, taking medicine, getting vaccinated... in a fun as well as educational manner. Since the books are also bilingual, parents will enjoy the teaching and the interactivity they can gain from reading them with their children.THE AUDIENCEThe books are geared towards children aged 2-5, before elementary/primary school.They will likely be bilingual children whose parents want to encourage the learning of their two current languages.They will also be children whose parents want to teach a language at a young age.Some teachers have also been using the books of the series as a way to teach a second language to children, with themes easy for them to both understand and memorise.THE CURRENT BOOKSThere are currently seven books in the series.Each episode brings on new animals, new words, new situations and new stories.- Ep.1. "These Animals... Don't Want to Wash" (2008)- Ep.2. "These Animals... Don't Want to Eat!" (2009)- Ep.3. "These Animals... Don't Want to Sleep!" (2010)- Ep.4. "These Animals... Don't Want to Go to School!" (2011)- Ep.5. "These Animals... Don't Want to Share!" (2011)- Ep.6. "These Animals... Don't Want to Take their Medicine!" (2012)- Ep.7. "These Animals... Don't Want to Get Vaccinated!" (2012)The books are all available in either bilingual or monolingual versions:- Bilingual versions: English-French, English-Portuguese, English-Italian, English-Spanish, English-Swedish, English-Creole, English-Japanese...More versions still to come!Check out the official website: www.TheBookOfTheAnimals.comREVIEW"The Book of the Animals is a planned series of illustrated books for young children. [...] These delightful books tell the story of what happens when the animals in the stories, like many young children, don't want to eat and don't want to wash...The books are very suitable both for reading to young children and for older children to use to learn to read in both languages. They might even persuade them to wash and eat their dinner!The repetitive structure is supportive of children learning new words and the illustrations work well alongside the text to help understanding of unfamiliar words.I can easily imagine young children demanding repeat readings and enjoying learning the text by heart as many children do with favourite stories. Children learning to make up and write their own stories might well want to write a personalised version, using the structure as a prop.I think the stories would work well both in the home and in the classroom."(Review published in The Cass School of Education, by Dr Raymonde Sneddon, Research Fellow for "The Cass School of Education" at the University of East London, and Honorary Research Fellow of Birkbeck College, in the Department of Applied Linguistics)SUPPORT"The Book of The Animals' series is supported & recommended by ABRIR UK, a Brazilian Association for Educational Projects in the United Kingdom. www.Abrir.org.ukofficial website: TheBookOfTheAnimals.com

With a trailblazing career that spans more than seventy-five years and continues to this day, with recent creations that include a Martini glass featured in Bombay Sapphire ads and vases for Klein-Reid, Eva Zeisel stands at the forefront of modern designers. Her works are a reflection of a profoundly independent vision and are featured in the permanent collections of museums throughout the world, including the Metropolitan Museum of Art and the Museum of Modern Art. In this lavishly illustrated, full-color book, the designer for the first time communicates the ideas that have guided and inspired her. Each aspect of the design process is analyzed:variety, spontaneity, line, contour, shading, and texture, among others?to show how the best works are the result of a dialogue between creator and object, the result of which is an environment that is pleasurable, comfortable, and elegant. The language in which this dialogue is conducted, ?the language of things, ? is one in which Zeisel's fluency is unparalleled, and her thoughts, read alongside the photos of her stunning creations and those that have inspired her, make this book indispensable to every enthusiast of art, ceramics, and design.

Getting others to do things is a central part of social interaction in any human society. Language is our main tool for this purpose. In this book, we show that sequences of interaction in which one person's behaviour solicits or occasions another's assistance or collaboration share common structural properties that provide a basis for the systematic comparison of this domain across languages. The goal of this comparison is to uncover similarities and differences in how language and other conduct are used in carrying out social action around the world, including different kinds of requests, orders, suggestions, and other actions brought together under the rubric of recruitment.

A brilliant exposé of the interaction between art, design, and commerce. In "The Language of Things," the director of London's Design Museum charts our relationship with all things designed. With scintillating wit and an eye for the pleasures and dangers of rampant consumerism, Deyan Sudjic takes us from luxury car commercials to glossy advertisements for seasonal variations of the Prada purse to the hype surrounding the latest version of the iPhone, exploring how we are manipulated and seduced by our possessions. Who would've thought that it's the subtle visual similarity between the Volkswagen Golf GTI and the barrel of an automatic pistol that makes people want to get behind the wheel? And why is it that digital cameras in cell phones "click" even though they don't have a shutter? Sudjic's illuminating argument will resound with anyone who has ever been affected by how things look--lured, in other words, by the powerful siren call of design.

In The 5 Love Languages, you will discover the secret that has transformed millions of relationships worldwide. Whether your relationship is flourishing or failing, Dr. Gary Chapman's proven approach to showing and receiving love will help you experience deeper and richer levels of intimacy with your partner starting today.

Long overlooked, the natural philosophy and theosophy of the Scandinavian scientist-turned-mystic Emanuel Swedenborg (1688-1772) made a surprising impact in America. Thomas Jefferson, while president, was so impressed with the message of a Baltimore Swedenborgian minister that he invited him to address both houses of Congress. But Swedenborgian thought also made its contribution to nineteenth-century American literature, particularly within the aesthetics of American Transcendentalism. Although various scholars have addressed how American Romanticism was affected by different currents of Continental thought and religious ideology, surprisingly no book has yet described the specific ways that American Romantics made persistent recourse to Swedenborg for their respective projects to re-enchant nature. In A Language of Things, Devin Zuber offers a critical attempt to restore the fundamental role that religious experience could play in shaping nineteenth-century American approaches to natural space. By tracing the ways that Ralph Waldo Emerson, John Muir, and Sarah Orne Jewett, among others, variously responded to Swedenborg, Zuber illuminates the complex dynamic that came to unfold between the religious, the literary, and the ecological. A Language of Things situates this dynamic within some of the recent "new materialisms" of environmental thought, showing how these earlier authors anticipate present concerns with the other-than-human in the Anthropocene.
