The Renaissance, with its belief in a new world in the making and its eagerness to embrace any new form of thinking, may represent the first "New Age" movement—i.e., the first secular millennial movement on record. From the Renaissance onward European culture developed an ever-more secular strain of millennialism. In a sense, the longer God tarried, the more humans took over his job of bringing about the perfect kingdom.

We believe in radical hope. The Black Millennial Renaissance is a network of Black Millennials and their allies fighting to end systemic racism. In the spirit of our ancestors and their fight for Civil Rights, we are answering the call of the Black Lives Matter Movement to organize, educate, and empower society to heal the wounds of slavery and the decades of discrimination and oppression that have followed.

Matches are also having a renaissance moment - a shell painted matchbox collaboration between blogger Alex Stedman and designer Frances Costelloe, priced at £9, was an online sell-out.

Millennials are the media's favourites. We can't hold on to jobs. We aren't buying houses. We don't save for retirement. If we go to university, we're racking up debt—and if we don't, we're slackers and dropouts. Here's the thing: if we don't own or achieve the traditional trappings of "adulthood," it's because the baby boomers have ruined it for us. They own the affordable housing. They snagged all the decent pension plans and are staying in the job market longer. They're eating up state-run pension programs—and oh, yeah...they brought the economy to a crashing halt a few years back. So why would we want to "adult" like them? It's not as if their way worked out well. In The Millennial Renaissance, millennial and business entrepreneur Lucy Cohen offers millennials an alternative to the path taken by the boomers—an innovative and attainable approach to both living well and realistically planning for retirement. Nothing you've been taught about retirement planning applies anymore. You're going to have to forge your own path in a world with new financial and career expectations. Your parents might not like it. The media certainly won't. But we're millennials, and we walk our own path.

This book pays tribute to the Harlem Renaissance and the talents of JamPoet. Inspired by the artistic greats, New Harlem is a great read.

JamPoet broadens the spectrum of artistry by inviting poets to come and share the pages with her on a journey of spoken word, poetry, and illustration.

This edited collection focuses on the X-Men film franchise, with essays that considers the movies as popular culture products. Chapters in this volume address various aspects featured in individual films or throughout the series. The essays discuss such topics as gender, race, class, sexuality, disability, and a sense of "otherness" that pervades the franchise. Although the book focuses specifically on the X-Men films, an analysis that considers the X-Men's transformation from comics to movies will be included.

You Can Predict the Future Throughout the centuries the future has been seen in dreams, in visions, and by seers. But you don't have to be a prophet or a visionary to predict what the future holds. Now, Ingo Swann explains how to understand and use the future-predicting ability that lies within. He identifies the different ways the future is revealed: Spontaneous forewarnings during dreams Spontaneous alerts that happen when awake Forewarnings and alerts communally experienced by numbers of people while sleeping or while awake Consciously controlled future-seeing achieved by seers Ingo Swann also presents fascinating, documented examples of prophecies that came true, ranging from those that foresaw the sinking of the Titanic to his own prediction of the fall of the Berlin Wall. Your Nostradamus Factor explains how you can develop your ability to foresee the future by: • Overcoming blocks to future-seeing • Tracking a particular subject and testing your predictions • Using astrology to help see the future, and • Paying close attention to your dreams. With the millennium right around the corner, Swann also offers startling predictions for the future of the environment, the economy, science, and society. (originally published in 1993)

Mr. Rowlands most famous and critically acclaimed book No More School (E. P. Dutton) literally launched the home-teaching movement. This collection of his essays will not just inform readers but also surprise and intrigue them. The topics range from politics, science, religion, technology, and music to economics, health, and sociology. And though his command of facts in each of these fields is admittedly not that of the specialist, the academic, or the reporter, what makes his views so riveting are the totally fresh perspective and unencumbered insights that he brings to these subjects.

While public health is important for revolutionary Cuba, providing medical services to the developing world is also a priority: 38,000 medical staff are engaged abroad; the largest medical school in the world (ELAM) has an enrollment of over 8,000 students from the Third World; and since 2004 over 1.3 million in Latin America and the Caribbean have had their eyesight restored. How has this small nation of 11.3 million people managed to save more lives in the developing world than all of the G-8 countries together? And what are its motives? This book, the result of four years of research in Cuba, provides an updated analysis of this extraordinary record.

Millennials have captured our imaginaries in recent years. The conventional wisdom is that this generation of young adults lives in downtown neighbourhoods near cafes, public transit and other amenities. Yet, this depiction is rarely unpacked nor problematized. Despite some commonalities, the Millennial generation is highly diverse and many face housing affordability and labour market constraints. Regardless, as the largest generation following the post-World War II baby boom, Millennials will surely leave their mark on cities. This book assesses the impact of Millennials on cities. It asks how the Millennial generation differs from previous generations in terms of their labour market experiences, housing outcomes, transportation decisions, the opportunities available to them, and the constraints they face. It also explores the urban planning and public policy implications that arise from these generational shifts. This book offers a generational lens that faculty, students and other readers with interest in the fields of urban studies, planning, geography, economic development, demography, or sociology will find useful in interpreting contemporary U.S. and Canadian cities. It also provides guidance to planners and policymakers on how to think about Millennials in their work and make decisions that will allow all generations to thrive.

An incendiary examination of burnout in millennials--the cultural shifts that got us here, the pressures that sustain it, and the need for drastic change

How can someone be authentic in an inauthentic culture? Cavanaugh James, Millennial at large, answers this question with his all-too-rare blend of wit, honesty, and genuine love. This in-process man invites you to meet him as your friend as he opens up about real struggles and the Truth that grounds him in a subjective "my truth" culture. If you're a Millennial who feels misunderstood or someone who wants to connect with Millennials, Cavanaugh is here to bridge the communication gap and finally clear the air.
