"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." – Malachi Rempen: Filmmaker, cartoonist, and self-described ruffian This book grew out of a series of letters to my daughter concerning various things—mostly about money and investing—she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRS (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

The author shares his personal techniques, insights and experiences regarding saving money and investing, drawn from his blog posts as well as a series of letters to his teenage daughter, both dealing with money management.

By now to get the key takeaways from J. L. Collins's *The Simple Path to Wealth*. Sample Key Takeaways: 1) Debt has become extremely normalized. However, if you intend to achieve financial freedom, you have to realize that debt is a huge barrier to building wealth. 2) If you are already in debt, paying it off should be your top priority. This will require you to drastically adjust your lifestyle to free up the money you need to direct toward your debt. Once your debts are paid off, consider shifting your money to investments.

From two leaders of the FIRE (Financial Independence, Retire Early) movement, a bold, contrarian guide to retiring at any age, with a reproducible formula to financial independence a bull\*\*\*t-free guide to growing your wealth, retiring early, and living life on your own terms Kristy Shen retired with a million dollars at the age of thirty-one, and she did it without hitting a home run on the stock market, starting the next Snapchat in her garage, or investing in hot real estate. Learn how to cut down on spending without decreasing your quality of life, build a million-dollar portfolio, fortify your investments to survive bear markets and black-swan events, and use the 4 percent rule and the Yield Shield—so you can quit the rat race forever. Not everyone can become an entrepreneur or a real estate baron; the rest of us need Shen's mathematically proven approach to retire decades before sixty-five.

If a stock market crash worries you, you must read this book. \*\*\*UPDATE\*\*\* Includes information on how the new tax reform bill signed into law as The Cuts and Jobs Act of 2017 ("TCJA") Public Law 115-97 affects the investment strategy in this book. \*\*\*\*\*On one of his shows in the early eighties, right after his usual, "Welcome my friends, welcome to my world" intro, Bruce Williams, a popular talk show host of that era went right into the news of the day. I can remember as if it were yesterday, he said, "In today's financial news, you can now buy a non-callable 30 year T-bond (30 year treasury bond) with a guaranteed interest rate of 14.5%. Imagine my friends, if you invest your \$50,000 today you will have \$2.5 million in 30 years. You don't have to invest in anything else. You don't have to buy gold, real estate or do anything fancy. I did not follow the advice, not because I did not have the cash (in fact my wife and I had close to \$100,000 in the bank by that time) but because, 1) 30 years is such a long time and at that age retirement was the furthest thing from my mind, 2) the advice simply sounded too good to be true. It sounded so incredible in its simplicity, it cannot possibly work, so I thought. There must be a catch somewhere. So I cast it off as satire or hyperbole from a talk show host always on the look-out for ratings. How wrong I was!! Imagine my friends, had I followed this sound advice from a talk show host, with little risk, my \$100,000 would have grown to \$5 million in 30 years. I could have retired in my fifties. In pursuit of Marlin on my own 48-foot fishing boat off Cabo San Lucas. Instead, I squandered a big chunk of my money pursuing riskier, more exotic investments. Though 14.5% treasuries are just now relics of bygone days along with The Wonder Years, Growing Pains and Happy Days, you can still turn \$50,000 into \$3.3 million by following the simple investment strategy in this book. You will not make the same mistake I made.

Many people bring spiritual practices into every aspect of their lives—except the boardroom! But spiritual guidance can be used just as easily to help fill the bottom line as it does to fill our hearts and souls. In *The Path to Wealth*, entrepreneur May McCarthy will show you how to create a true financial partnership with the all-knowing power in the universe that she calls your Chief Spiritual Officer, or "CSO." This is not a dogmatic book; McCarthy encourages you to partner with a higher power of your own understanding, but she is insistent on one point: this power is within you and it knows what must happen for you to receive what you want. In this book you'll learn the job descriptions for both yourself and your CSO, and you'll have a daily road map to help you achieve your financial goals. As you practice these steps daily, you will experience seeming miracles that you never thought possible, all with less effort and more fun. Once you decide what you want, it's the CSO's job to create the path to get you the goods you've defined. Your job is to follow each step in this daily practice and watch as the benefits you want unfold.

"The newbie investor will not find a better guide to personal finance." –Burton Malkiel, author of *A RANDOM WALK DOWN WALL STREET* TV analysts and money managers would have you believe your finances are enormously complicated, and if you don't follow their guidance, you'll end up in the poorhouse. They're wrong. When University of Chicago professor Harold Pollack interviewed Helaine Olen, an award-winning financial journalist and the author of the bestselling *Pound Foolish*, he made an offhand suggestion: everything you need to know about managing your money could fit on an index card. To prove his point, he grabbed a 4" x 6" card, scribbled down a list of rules, and posted a picture of the card online. The post went viral. Now, Pollack teams up with Olen to explain why the ten simple rules of the index card outperform more complicated financial strategies. Inside is an easy-to-follow action plan that works in good times and bad, giving you the tools, knowledge, and confidence to seize control of your financial life.
