Interspersed are their close friends, particularly Lulu and Dan, Vincent, grandmother Annie and Shauna's very interesting ♫ parents.

They have seen each other through everything--from Sophie's private fear that she doesn't actually want to be a mother despite having two kids, to Amy's perfect-on-the-outside marriage that starts to reveal troubling warning signs, to Melissa's spiraling alcoholism, to questions that are suddenly bubbling up around the paternity of Emily's son. But could a lie that spans just as long as their friendship be the thing that tears them apart?

Powerful ideas from narrative therapy can teach us how to create new life stories and promote change. Our lives and their pathways are not fixed in stone; instead they are shaped by story. The ways in which we understand and share the stories of our lives therefore make all the difference. If we tell stories that emphasize only desolation, then we become weaker. If we tell our stories in ways that make us stronger, we can soothe our losses and ease our sorrows. Learning how to re-envision the stories we tell about ourselves can make an enormous difference in the ways we live our lives. Drawing on wisdoms from the field of narrative therapy, this book is designed to help people rewrite and retell the stories of their lives. The book invites readers to take a new look at their own stories and to find significance in events often neglected, to find sparkling actions that are often discounted, and to find solutions to problems and predicaments in unexpected places. Readers are introduced to key ideas of narrative practice like the externalizing problems - "the person is not the problem, the problem is the problem" -and the concept of "re-membering" one's life. Easy-to-understand examples and exercises demonstrate how these ideas have helped many people overcome intense hardship and will help readers make these techniques their own. The book also outlines practical strategies for reclaiming one's experience in the face of specific challenges such as trauma, abuse, personal failure, grief, and aging. Filled with relatable examples, useful exercises, and informative illustrations, Retelling the Stories of Our Lives leads readers on a path to reclaim their past and re-envision their future.

Throughout the history of all humanity, including the native people in the western hemisphere, God made his existence known through the use of symbols (menorah's 9 candles, Star of David, spiral petroglyphs in Choco Canyon, Infinity sign) and numbers (3(Pi), 6 and 9). For example, using the "reduced" form of gematria, the word emet (Truth) has the value of 9. Chapter 3 - Norma, I now know; is what I believe is the true meaning of E=Mc2, or mathematical proof that God exist, Christ lived and will return again, Pi=3 not 3.14, Big Bang Law, String Law, operating system logic for quantum computers, God created the Universe in 6 days (24 years) and rested on the 7th day (- 4 years). My findings could lead to the cure for cancer and many other fatal illnesses. If Chapter - 3 is confirmed as God's Truth to all humanity by the world's wise men and women, I pray my assumptions are correct, and that someone recommends my book to their friends through email, Twitter, Instagram, YouTube and/or Facebook to find someone that will help me publish my findings in a Physics Journal and subsequently leading to a means to save the lives of your love ones and fellow human beings.
