The word "context" is the root of contextual, and it means "the circumstances that form the setting for an event, statement, or idea, and in terms of which it can be fully understood and assessed." Contextual theology, therefore, is theology that asserts the necessity of cultural context to fully understand a passage of Scripture.

Contextual Theology – What is it?

Theology in the Context of World Christianity. It's no secret that the center of Christianity has shifted from the West to the global South and East. While the truths of the Christian faith are universal, new contexts bring new questions, new understandings, and new expressions.

Terminology. The term contextualizing theology was used in missiology by Shoki Coe when he argued that the Venn-Anderson three-self principles were inadequate in addressing the sociopolitical context of his native Taiwan. Coe would popularize this notion through the Theological Education Fund of the World Council of Churches. While it was initially understood as part of a liberal approach to ...

Contextual theology - Wikipedia

Answer: Also known as "enculturation," contextual theology refers to the manner in which the church in every age tends to adapt its teachings to the culture in which it finds itself. There are many examples of this, but perhaps the best is found in 1 Corinthians 11:4–7. Paul's teaching here has to do with head coverings.

What is contextual theology? | GotQuestions.org

But this is not the normal context for ministering theology. Theology is not made for the retreat center; theology is made for the rough and tumble. Praise God this is so because we should expect a great deal of chaos in days to come. The fall of Adam fundamentally destabilized our world. In our time, our sociopolitical order seems to exist in ...

Theology in the Context of World Christianity - Olive Tree ...

Covenant theology is not just about how we are saved. The arc of the biblical narrative of creation, fall, redemption, consecration, and consummation is captured in covenant theology. Covenant theology situates our salvation in its proper context of the greater purposes of God. When God created the world, it was all very good (Gen. 1:31).

10 Things You Should Know about Covenant Theology ...

All theology throughout history has been expressed within the context of current religious and philosophical movements. This contextualization inevitably adds to or subtracts from the biblical revelation. The story begins in the early church.

Contextual Theology is an attempt to address that issue and to examine how a reassessment of the relationship of the Gospel to cultural context can advance this critical and necessary development. Through an accessible and critical approach, Matheny considers the historical background to contextual theology.

It's no secret that the center of Christianity has shifted from the West to the global South and East. While the truths of the Christian faith are universal, new contexts bring new questions, new understandings, and new expressions. What does this mean for theology? Is the Christian faith not only culturally translatable, but also theologically translatable?Timothy Tennent answers this question with a resounding yes. Theological reflection is alive and well in the majority world church, and these new perspectives need to be heard, considered, and brought into conversation with Western theologians. Global theology can make us aware of our own blind spots and biases. Because of its largely conservative stance, global theology has much to offer toward the revitalization of Western Christianity.Tennent examines traditional theological categories in conversation with theologians from across the globe, making this volume valuable for students, pastors, missionaries, and theologians alike.

John Polkinghorne is a major figure in today's debates over the compatibility of science and religion. Internationally known as both a theoretical physicist and a theologian—the only ordained member of the Royal Society—Polkinghorne brings unique qualifications to his inquiry into the possibilities of believing in God in an age of science. In this thought-provoking book, the author focuses on the collegiality between science and theology, contending that these "intellectual cousins" are both concerned with interpreted experience and with the quest for truth about reality. He argues eloquently that scientific and theological inquiries are parallel. The book begins with a discussion of what belief in God can mean in our times. Polkinghorne explores a new natural theology and emphasizes the importance of moral and aesthetic experience and the human intuition of value and hope. In other chapters, he compares science's struggle to understand the nature of light with Christian theology's struggle to understand the nature of Christ. He addresses the question, Does God act in the physical world? And he extends his ideas about the role of chaos theory, surveys the prospects for future dialogue between scientific and theological thinkers, and defends a critical realist understanding of the activities of both disciplines. Polkinghorne concludes with a consideration of the nature of mathematical truths and the links between the complementary realities of physical and mental experience.

In the 1970s theologians in Asia and Africa showed an interest in the way different cultural contexts influenced the interpretation of Christian belief. Manifestations of contextual theologies have since appeared in many parts of the world; animated international discussion about expressions, methods and theories for contextual theology have continued with the spread of contextual theology from the South to the North.. The object of these theologies is to shed new light on the concept of incarnation. How does the incarnated God act in a liberating way? Contextual theology explores awareness of the interrelatedness of God and culture. This book surveys important concepts, positions and problems of contextual theology, dealing with different criteria for the interpretation of 'context' and providing explanations of different theoretical models for contextual theology. Particular topics discussed include: the importance of place for the experience of God; a dynamic, correlative and communicative view of tradition; the approach to knowledge in contextualism and the greater right of the poor to aesthetic knowledge; human ecological formation of theology, and the contributions of pictorial art and architecture to contextual theology. Clearly explaining the importance of contextual theology for all theology, this book offers an invaluable text for students and others exploring theology in context.

In this book, Hans Schwarz leads us into the web of Christian theology's recent past from Kant and Schleiermacher to Mbiti and Zizoulas, pointing out all the theologians of the last two hundred years who have had a major impact beyond their own context. With an eye to the blending of theology and biography, Schwarz draws the lines of connection between theologians, their history, and wider theological movements. - Publisher.

A proposal for the need to concentrate on the basic and simple art of doing theology in the context of a world which needs a word that is distinct from its own - a world alienated from God and still yearning to overcome its primordial alienation. Theology must be able to convey the ultimate message which is without equal, to overcome being a minority voice in an overcrowded market. [TST 58*] \$89.95 248pp. 1991

This accessible text by James P. Ware provides both a concise guide to Paul's theology and a general introduction to the key issues and debates in the contemporary study of Paul. Examining Paul's message in the context of the ancient world, Ware identifies what would have struck Paul's original audience as startling or unique. By comparing Paul's teaching to the other religions and philosophies of that day, Ware presents a fresh perspective on Paul's theology, revealing four pillars of his thought: creation, incarnation, covenant, and kingdom. After examining each of these dimensions of Paul's gospel, Ware explores the historical role of Paul within Christian origins and the astounding evidence embedded in his letters regarding the beginnings of Christianity and the eyewitness origins of the gospels. Clergy, students, and laypeople will find that this guide to the big picture of Paul's theology will illumine and enliven the study, preaching, and teaching of all the Pauline letters.

"Mission is handicapped without a sound biblical theology of mission and an understanding of the history of mission leading up to our current context. Constants in Context offers both of these elements. It is mission theology in historical perspective and/or a history of mission that is grounded theologically. The authors describe it as a systematic theology with mission at its core, and a church history shaped by the constant but always contextual Christian traditions. Furthermore it is a constructive contribution to how mission theology needs to be practical and lived out through today's church and in our world. Written collaboratively by Roman Catholic writers Stephen Bevans and Roger Schroeder, both Missionaries of the Divine Word (SVDs). It is a particularly insightful in regard to the history and the various streams of Catholic mission but it also addresses and learns from the other traditions of the church. In fact, one of the book's strengths is its attention to neglected aspects and hidden stories of church and mission history. As a result it is gratifying to be inspired by non-European mission, women in mission and various forgotten or often ignored branches of the church. The book is in three sections: first, there is a framework for cultural contexts and theological constants; second, an in-depth exploration of historical stages and different models for mission; and third, a presentation of theological frameworks for mission. The third section concludes with a case for 'mission as prophetic dialogue' being the most appropriate model for 21st century mission." -- Amazon.com.

Just as gendered, cultural, and geographical perspectives have illuminated and advanced theological thought, the contributions of twentieth-century science have much to offer theology. In his latest book, physicist-theologian John Polkinghorne, renowned as one of the world's foremost thinkers on science and religion, offers a lucid argument for developing the intersection of the two fields as another form of contextual theology. Countering recent assertions by new atheists that religious belief is irrational and even dangerous, Polkinghorne explores ways that theology can be open to and informed by science. He describes recent scientific discourse on such subjects as epistemology, objectivity, uncertainty, and rationality and considers the religious importance of the evolution in these areas of scientific thought. Then, evaluating such topics as relativity, space and time, and evolutionary theory, he uses a scientific style of inquiry as a foundation on which to build a model of Christian belief structure. Science and theology share in the great human quest for truth and understanding, says Polkinghorne, and he illustrates how their interaction can be fruitful for both.

Karl Barth was a prolific theologian of the 20th century. This work places his theology in its social and political context from World War 1 to the Cold War.

Increasingly, theologians from non-Western lands demand that theology be done in a new, non-eurocentric way. First published in German, 'African Theology in Its Social Context', by one of Africa's most respected theologians, meets this challenge. Bujo takes traditional African values to the horizon of contemporary social issues: extreme poverty, mass unemployment, rapid urbanization, changing family life. His underlying concern is for the African people and for the models they will choose for their society, their economy, their church. Bujo begins with Jesus. Asking how Christ can be seen as an African among Africans, Bujo identifies Jesus as Ancestor -- the One from Whom all life flows. He goes on to define distinctively African roles for the church, clergy, and lay people alike. From the standpoint of African legal and religious traditions -- many far older than those of the Western church -- Bujo describes pastoral approaches to such issues as death and marriage in Africa. This original and challenging work shows how Africans need not change culture to be called children of God; and how, indeed, Christianity can become a source of fullness of life for Africans.
