Tourism is the world's fastest growing industry, and impacts globally upon ecology, economies, peoples, cultures and the built environment. Development, therefore, must be sustainable and sympathetic in order to preserve the environment and culture it exploits. Despite sustainable tourism being

an area of considerable recent interest, there has been no synthesis of the diverse considerations of sustainable tourism, and the language and terms particular to this subject. An important resource for researchers of tourism, this reference work defines and explains terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems.

This book explores how the policy-making process is changing in the very volatile conditions of present day mainland China, Taiwan and Hong Kong. It considers the overall background conditions - the need to rebalance in mainland China after years of hectic economic growth; governance transition and democratic consolidation in Taiwan; and governance crisis in Hong Kong under a regime of uncertain legitimacy. It examines the various actors in the policy-making process - the civic engagement of ordinary people and the roles of legislators, mass media and

bureaucracy – and discusses how these actors interact in a range of different policy cases. Throughout the book contrasts the different approaches in the three different jurisdictions, and assesses how the policy-making process is changing and how it is likely to change further.

Travel, Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social, cultural, or linguistic groups. Whether such contact is the result of tourism, seeking exile, or relocating abroad,

the volume's contributors demonstrate how one's identity, cultural assumptions, and worldview can be brought into question. In some cases, the traveler finds that bridging the social and cultural gap between himself and the new society is fairly easy. In other cases, the traveler discovers that reorienting himself requires absorbing a new cultural history and traditions. The contributors argue that making these adjustments will surely enhance the traveler's or tourist's experience; otherwise the traveler or tourist will be at risk of becoming a marginalized figure, one

disconnected from the society that surrounds him. This latest volume in the Culture & Civilization series features a collection of essays on travel and tourism. The essays cover a range of topics from historical travels to modern social identities. They discuss ancient travels, contemporary travels in Europe, Africa and sustainable eco-tourism, and the politics of tourism. Essays also address experiences of Grenada's "Spice Island" identity, and the effects of globalization and migrations on personal identity.

More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights, the issue of mobility and the right to tourism itself have become increasingly significant

areas of scholarly interest and political debate. However, despite the fact that cross-border travel implies certain citizenship rights as well as the material capacity to travel, the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature. This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically-informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship, with particular emphasis on the

ideological and political alignments between the freedom of movement and the right to travel. The text weaves its analysis of citizenship and travel in the context of addressing large-scale societal transformations engendered by globalization, neoliberalism and the geopolitical realignments between states, as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves. By doing so, it focuses on key themes including: tourism and social citizenship rights; race, culture and minority rights; states, markets and the

freedom of movement; tourism, peace and geopolitics; consumerism and class; and, ethical tourism, global citizenship and cosmopolitanism. The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity. This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science. It is sometimes said that, in the 21st century, the country that tells the better story wins, rather than the country whose army can prevail on the battlefield. That ability to attract others, persuade and set the agenda, soft power, plays an increasingly important role in international relations and in Indian foreign policy. However, while most of the rediscovered interest in India has been focused on its hard power attributes, such as its military and economy, this book

concentrates on less tangible assets, such as its culture, ideas and people. The first comprehensive analysis of India's soft power done from an international relations perspective, this book tracks the changes in Indian foreign policy over last two decades to show how soft power strategy, tools and institutions have been given a more prominent place in India's external affairs. The study evaluates India's soft power assets and liabilities and shows how the state is trying to make better use of this potential to realise its national interests. It assesses the effectiveness of India's soft power

approach and provides recommendations on possible improvements to make India a major smart power in the future. An intriguing and comprehensive analysis, it will be valuable for students and scholars interested in Indian foreign policy, soft power theory and international relations. Underlining India's uniqueness, it substantiates the argument that soft power is not confined to the Western world. Thus, it contributes an interesting case study for comparative study of soft powers. Tourism is often a key driver of economic growth in many countries. The recent upward trends of tourism and hospitality education in higher academic institutions in Bangladesh suggests a growing tourism sector. Very little has been written on Bangladesh's tourism industry. This is the first edited volume published from an international publisher which looks at this industry and how it has developed and flourished. The book begins by looking at tourism policy planning and provides a comprehensive overview of

topics from tourism products and services in Bangladesh to how they are being marketed. It also discusses how private and public tourism institutions can address future long term trends. This book will appeal to those interested to learn more about developing tourism industry in emerging economies and may provide invaluable lessons from Bangladesh's experience and success.
