1.1.1. The Traffic Signs Manual (the Manual) offers advice to traffic authorities and their contractors, designers and managing agents in the United Kingdom, on the use of traffic signs and road markings on the highway network. Mandatory requirements are set out in the Traffic Signs Regulations and General Directions 2016 (as amended) (TSRGD).

The Part 3 Update provides information on changes to the methods used to prescribe traffic signs in the 2016 Traffic Signs Regulations and General Directions. In most cases, the same signs will be used in the same situations as shown in Parts 1 and 2 (2009). This part provides a reference on where the requirements for individual signs in the TSRGD and design information can be found. This part introduces new options for lane control 'wicket' signs and guidance on how these new options should be applied to different types of schemes. While this part does not replace the design of temporary traffic management arrangements it does provide updates on relaxation schemes and on selecting safe methods of installing signs and other equipment.

# Get Free Traffic Signs Manual Chapter 8

This document provides guidance for those responsible for the design of temporary traffic management arrangements which should be implemented to facilitate maintenance activities or in response to temporary situations. It contains advice relating to traffic safety measures, and the identity and location of the traffic signs needed to guide road users, including pedestrians, safely past obstructions in temporary situations. It is structured to facilitate and reflect the design process for temporary traffic management, from the initial broad brief to details of signing provision. It raises the principal issues that need to be considered in temporary traffic management design and provides advice about their resolution. The document deals with the design of temporary traffic management arrangements on single carriageway roads and dual carriageway roads separately. The design guidance is illustrated by the inclusion of sample plans. This edition supersedes the 2006 edition (ISBN 9780115527388)

This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts:

# Get Free Traffic Signs Manual Chapter 8

Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

In the operation and maintenance of highway networks, it is necessary from time to time to put in place temporary traffic management measures to facilitate safe road works or temporary closures or incident management, whilst keeping the traffic flowing as freely as possible. The Operations Document provides guidance for those responsible for planning, managing and participating in operations to implement, maintain and remove temporary traffic management arrangements.

This publication supersedes the 2008 edition (ISBN 9780115529252)

This publication supersedes the 2013 edition (ISBN 9780115532221)
