A chance sailing trip
with a friend from work
led me to wonder if I

Page 33/39

could learn to sail. After all, I'm a woman, and the sailing world seems to favor men. I am not athletic; I didn't grow up in a family where we learned about boating; I would be starting late, since I was in my thirties; and I suffer from seasickness. What I discovered over the next twenty-five years is that I could indeed learn

to be a competent sailor.

But I didn't expect to be an expert overnight.

Instead, as a novice, I layered on new

knowledge slowly, over time, through

experiential learning.

This book describes the process whereby this

happened. Using examples from trips

along the coast of

Maine, New Hampshire,

and Massachusetts, it reviews the essential knowledge needed to be a sailor as well as explanations about the parts of a sailboat, major boat systems, and tasks associated with maintaining a sailboat. It also discusses some Zen-like attitudes that lead to successful and fun sailing, such as focusing, the no-blame

rule, and stripping down to the essentials. Unlike some other sailing guides, this book points out that sailing can be a lifestyle that includes many dimensions. It's not just about getting a boat to sail. Traveling by boat is a unique experience, and visiting small coastal New England communities is an adventure. Learning

about history, art, ecology, star constellations, technology, and birds are only a few of the kinds of activities that can be built into a rich and rewarding sailing experience. This book will be helpful for people who would like to learn to sail but who are intimidated by the process, particularly

women, fledgling sailors
just starting out, and
families with children.
