"Susan was faced with a final ultimatum; give up her soul to the evil that permeated her life or defy certain torture and death by emerging from her cocoon of naivety to become the third most important woman in the FBI's international files. By taking down dozens of some of the most ruthless and evil murderers and politicians in the history of the Deep South, Susan chose wisely"--P. [4] of cover.

The incredibly moving and inspiring story about a quest to finally be heard. In *Underestimated: An Autism Miracle, Generation Rescue's* cofounder J.B. Handley and his teenage son Jamison tell the remarkable story of Jamison's journey to find a method of communication that allowed him to show the world that he was a brilliant, wise, generous, and complex individual who had been misunderstood and underestimated by everyone in his life. Jamison's emergence at the age of seventeen from his self-described "prison of silence" took place over a profoundly emotional and dramatic twelve-month period that is retold from his father's perspective. The book reads like a spy thriller while allowing the reader to share in the complex emotions of both exhilaration and anguish that accompany Jamison's journey for him and his family. Once Jamison's extraordinary story has been told, Jamison takes over the narrative to share the story from his perspective, allowing the world to hear from someone who many had dismissed and cast aside as incapable. Jamison's remarkable transformation challenges the conventional

wisdom surrounding autism, a disability impacting 1 in 36 Americans. Many scientists still consider nonspeakers with autism—a full 40 percent of those on the autism spectrum—to be “mentally retarded.” Is it possible that the experts are wrong about several million people? Are all the nonspeakers like Jamison? *Underestimated: An Autism Miracle* will touch your heart, inspire you, remind you of the power of love, and ultimately leave you asking tough questions about how many more Jamisons might be waiting for their chance to be freed from their prison of silence, too. And, for the millions of parents of children with autism, the book offers a detailed description of a communication method that may give millions of people with autism back their voice.

YEAR BY FORTUNE In 2015, Arlan Hamilton was on food stamps and sleeping on the floor of the San Francisco airport, with nothing but an old laptop and a dream of breaking into the venture capital business. She couldn't understand why people starting companies all looked the same (white and male), and she wanted the chance to invest in the ideas and people who didn't conform to this image of how a founder is supposed to look. Hamilton had no contacts or network in Silicon Valley, no background in finance—not even a college degree. What she did have was fierce determination and the will to succeed. As much as we wish it weren't so, we still live in a world where being underrepresented often means being underestimated. But as someone who makes her living investing in high-potential founders who also happen to be female, LGBTQ, or people of color, Hamilton understands that being undervalued simply means that a big upside exists. Because even if you have to work twice as hard to get to the starting line, she says, once you are on a level playing field, you will sprint ahead. Despite what society would have you believe, Hamilton argues, a privileged background, an influential network, and a fancy college degree are not prerequisites for success. Here she shares the hard-won wisdom she's picked up on her remarkable journey from food-stamp recipient to venture capitalist, with lessons like "The Best Music Comes from the Worst Breakups," "Let Someone Shorter Stand in Front of You," "The Dangers of Hustle Porn," and "Don't Let Anyone Drink Your Diet Coke." Along the way, she inspires us all to defy other people's expectations and to become the role models we've been looking for. Praise for *It's About Damn Time* "Reading Arlan Hamilton's *It's About Damn Time* is like having a conversation with that frank, bawdy friend who somehow always manages to make you laugh, get a little emo, and, ultimately, think about the world in a different way. . . . Everyone is looking for power. Political campaigns play to the power of fear and hope; advertising agencies rely on the power of appetite, both wielding power by the means of words. But churches have something different and better. Churches have the gospel. Though we live in the world, we must not wage war like the world, or fight with its weapons. On the contrary, we have divine power to demolish strongholds. The gospel consists merely of words, but those words have the unexpected and underestimated power to create new life, to justify, to prepare a bride, to give the foretaste of glory. Christian conversion depends upon the underestimated power of the gospel. Authors Jonathan Leeman, R. Albert Mohler Jr., Thabiti Anyabwile, David Platt, Kevin DeYoung, Mark Dever, C.J. Mahaney, Matt Chandler, John Piper, and J. Ligon Duncan III call readers to herald a common refrain: Do not underestimate the gospel, and do not underestimate the God of this gospel.

Given that Peter fades from view halfway through the book of Acts and that he left no gospel account in his name, it is tempting for many biblical scholars to dismiss him as a vague figure in Christian history and downplay his influence in the early church. Martin Hengel rejects this underestimation of the apostle and argues that Peter was in fact the Rock, central to the development of both the Jewish and the Gentile Christian communities. Hengel clearly shows how each of the four gospels specifically highlights Peter's foundational role. He considers what Peter's message must have been as an eyewitness of Christ, reflects on Peter's theology, and draws attention to Peter's work as an organizer and mission strategist. Hengel also

This book is a sound science report about the consequences of pesticides to nature, health and environment. The book shares essential insights into the use of pesticides in agriculture, discusses the politics, rhetoric and profits involved, addresses the potential health and ecological risks of pesticides in our daily lives, and debates possible solutions. Does sustainable agriculture exist, and is agriculture without pesticides possible at all? Moreover, the author gives insight into his scientific work, the set-up of the experiments, and also writes about his very own experiences with the media and press after publication of his studies. For many years, Johann G. Zaller, an ecologist at the University of Natural Resources and Life Sciences in Vienna, and his team, have been researching applied chemicals and their effects on the environment. Their findings, together with relevant literature and media reports, are presented in this book, which offers a unique resource for anyone who wants to know the nature and background of pesticides and how we come into contact with them in our daily lives. Ever ate an apple? Read this book!

This book introduces a new Human Factors concept that includes the air passenger as an integral part of the aviation system. It develops a revised Reason Model on Human Error that applies its principles to the prevention of passenger misconduct, with a focus on organizational issues affecting the interface between the air passenger and the airlines. It also builds a synergistic model addressing the traditional conflict between safety and service objectives. Incorporating a diffusion of air traveller tension, a Passenger Risk Management Model leads to a strategic approach for reducing incidents of Air Rage.
