An intriguing novel with a classic feel, featuring three vividly alive young sisters, an eccentric family struggling against the odds, and the slowly revealed story of a house with a past.

“ Mofina is one of the best thriller writers in the business. ” —Library Journal A loving family, fracturing under pressure. . . Jeff Griffin, a mechanic, and his wife, Sarah, travel from Montana to Manhattan to give their nine-year-old son, Cole, his dream vacation as they secretly face the heart-wrenching turmoil that has them teetering on divorce. In the wake of their heartbreak, a mother and son disappear. . . While sightseeing near Times Square, Jeff steps into a store to buy batteries for their camera—but upon returning to the street he finds that Sarah and Cole have vanished. A frantic father searches for clues as time ticks down. . . Battling his anguish and police suspicions, Jeff fights to rescue Sarah and Cole. He knows now that the love he and Sarah have is worth saving. But he could lose the chance to tell her amid growing fears that they have become entangled in an unfolding plot that could have global consequences. Originally published in 2012. “ Don ’ t miss Search for Her, the newest thrill-ride from Rick Mofina! ”

This ready reference is the first to collate the interdisciplinary knowledge from materials science, bioengineering and nanotechnology to give an in-depth overview of the topic. As such, it provides broad coverage of combinations between inorganic materials and such key biological structures as proteins, enzymes, DNA, or biopolymers. With its treatment of various application directions, including bioelectronic interfacing, tissue repair, porous membranes, sensors, nanocontainers, and DNA engineering, this is essential reading for materials engineers, medical researchers, catalytic chemists, biologists, and those working in the biotechnological and semiconductor industries.
