“ A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic. ” —Bethany McLean, New York Times Book Review Faster, Higher, Farther chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, New York Times correspondent Jack Ewing documents why VW felt compelled to install “ defeat devices ” in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. Faster, Higher, Farther is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.

Organizational Compliance and Ethics is designed to provide the theoretical and practical foundations for a career in global compliance, addressing the full range of subject matters that a lawyer may encounter in managing legal risk for a multinational enterprise. While the book explores this new field through the prism of the FCPA, it imparts a skill-set that is broadly applicable to different industries and compliance-related functions. In particular, students learn how to

This book discusses all aspects of advanced engine technologies, and describes the role of alternative fuels and solution-based modeling studies in meeting the increasingly higher standards of the automotive industry. By promoting research into more efficient and environment-friendly combustion technologies, it helps enable researchers to develop higher-power engines with lower fuel consumption, emissions, and noise levels. Over the course of 12 chapters, it covers research in areas such as homogeneous charge compression ignition (HCCI) combustion and control strategies, the use of alternative fuels and additives in combination with new combustion technology and novel approaches to recover the pumping loss in the spark ignition engine. The book will serve as a valuable resource for academic researchers and professional automotive engineers alike.

A shocking exposé of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In *Faster, Higher, Farther*, Jack Ewing rips the lid off the scandal. He describes VW's rise from "the people's car" during the Nazi era to one of Germany's most prestigious and important global brands, touted for being "green." He paints vivid portraits of Volkswagen chairman Ferdinand Piëch and chief executive Martin Winterkorn, arguing that their unremitting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, *Faster, Higher, Farther* reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud--with potentially devastating consequences. As the future of one of the world's biggest companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.
