Former Wall Street Journal technology reporter Yukari Iwatani Kane delves deep inside Apple in the two years since Steve Jobs's death, revealing the tensions and challenges CEO Tim Cook and his team face as they try to sustain Jobs's vision and keep the company moving forward. Steve Jobs's death raised one of the most pressing questions in the tech and business worlds: Could Apple stay great without its iconic leader? Many inside the company were eager to prove that Apple could be just as innovative as it had been under Jobs. Others were painfully aware of the immense challenge ahead. As its business has become more complex and global, Apple has come under intense scrutiny, much of it critical. Maintaining market leadership has become crucial as it tries to conquer new frontiers and satisfy the public's insatiable appetite for "insanely great" products. Based on over two hundred interviews with current and former executives, business partners, Apple watchers and others, Haunted Empire is an illuminating portrait of Apple today that offers clues to its future. With nuanced insights and colorful details that only a seasoned journalist could glean, Kane goes beyond the myths and headlines. She explores Tim Cook's leadership and its impact on Jobs's loyal lieutenants, new product development, and Apple's relationships with Wall Street, the government, tech rivals, suppliers, the media, and consumers. Hard-hitting yet fair, Haunted Empire reveals the perils and opportunities an iconic company faces when it loses its visionary leader.

"An important reminder of simple everyday practices to improve how we all work together, which will lead to greater team and individual happiness and performance. Great results will follow."—Jack Dorsey, CEO of Twitter and Square "With just 30 changes, you can transform your work experience from bland and boring (or worse) to fulfilling, fun, and even joyful."—Daniel Pink, author of When and Drive The vice president of Twitter Europe and host of the top business podcast Eat Sleep Work Repeat offers thirty smart, research-based hacks for bringing joy and fun back into our burned out, uninspired work lives. How does a lunch break spark a burst of productivity? Can a team's performance be improved simply by moving the location of the coffee maker? Why are meetings so often a waste of time, and how can a walking meeting actually get decisions made? As an executive with decades of management experience at top Silicon Valley companies including YouTube, Google, and Twitter, Bruce Daisley has given a lot of thought to what makes a workforce productive and what factors can improve the workplace to benefit a company's employees, customers, and bottom line. In his debut book, he shares what he's discovered, offering practical, often counterintuitive, insights and solutions for reinvigorating work to give us more meaning, productivity, and joy at the office. A Gallup survey of global workers revealed shocking news: only 13% of employees are engaged in their jobs. This means that burn out and unhappiness at work are a reality for the vast majority of workers. Managers—and employees themselves—can make work better. Eat Sleep Work Repeat shows them how, offering more than two dozen research-backed, user-friendly strategies, including: Go to Lunch (it makes you less tired over the weekend) Suggest a Tea Break (it increases team cohesiveness and productivity) Conduct a Pre-Mortem (foreseeing possible issues can prevent problems and creates a spirit of curiosity and inquisitiveness) "Let's start enjoying our jobs again," Daisley insists. "It's time to rediscover the joy of work."

Recent years have yielded significant advances in computing and communication technologies, with profound impacts on society. Technology is transforming the way we work, play, and interact with others. From these technological capabilities, new industries, organizational forms, and business models are emerging. Technological advances can create enormous economic and other benefits, but can also lead to significant changes for workers. IT and automation can change the way work is conducted, by augmenting or replacing workers in specific tasks. This can shift the demand for some types of human labor, eliminating some jobs and creating new ones. Information Technology and the U.S. Workforce explores the interactions between technological, economic, and societal trends and identifies possible near-term developments for work. This report emphasizes the need to understand and track these trends and develop strategies to inform, prepare for, and respond to changes in the labor market. It offers evaluations of what is known, notes open questions to be addressed, and identifies promising research pathways moving forward.

The famed political advisor to Uber, FanDuel, Lemonade, Tesla and other startups reveals what really happens at the intersection of politics, tech and business Most new startups today are in highly regulated industries with strong incumbents - transportation, hotels, drones, energy, gaming, education, health care, cannabis, finance, liquor, insurance. The more startups try to snatch a piece of the establishment's pie, the more they risk running into a political wall. That's where Bradley Tusk comes in. Described as "Silicon Valley's Political Savior" (Fast Company) "Uber's Political Genius" (Vanity Fair) and "Silicon Valley's Favorite Fixer" (TechCrunch) Tusk deploys the skills and knowledge he developed working with Chuck Schumer, Michael Bloomberg, Rod Blagojevich, and other political and business legends to help startups fight back. This book goes behind the scenes on how he helped stop the taxi industry from killing Uber in its infancy, how he held insurance companies at bay while startup Lemonade launched in each state, and how he helped online sports betting sites FanDuel and Draft Kings escape the regulatory death grip casinos tried to put on them. As Tusk writes, "Every new company is essentially a tech startup. And when you disrupt someone in any industry, they don't say thank you. They punch you in the nose. These are the lessons startups need to learn to punch back and survive the clutches of politics." Combining a firsthand glimpse behind the curtain with tangible advice for how any new venture can play the political game, THE FIXER is a must-read for aspiring entrepreneurs.
