'We cannot separate the writer from the writing. Nor should we try. Both our writing process and our writing products need to carry our unique signature, a bit of our personality.' - From Writing and Personality How you write - what works for you and what makes sense to you - depends on who you are, your personality, your preferences, your style of thinking and feeling. If you're extraverted and grounded in your senses, your natural writing style will be far different from the person who tends to be introverted and intuitive. Not only that, how you learn to write will be different as well. Here's a book that taps into the natural strengths of your personality and helps you use those strengths in your writing. Whether you're a student, businessperson, or professional writer, this book will help you: engage your natural writing voice; adapt to styles that are less natural; overcome writer's block; and find the right words for communicating effectively, whatever your assignment.

This detailed, example-driven guide illustrates how much technical communicators can do to make written texts more suitable for a global audience. You'll find dozens of guidelines that you won't find in any other source, along with thorough explanations of why each guideline is useful.

This invaluable workbook-style reference guide will help you transition from writing for composition classes to writing for psychology classes. Author Lenore T. Szuchman's years of experience teaching writing-intensive courses give her an inside track on the trouble spots students often encounter when writing papers and dealing with APA style. The unique workbook format offers both a quick reference to APA style and interactive exercises that give you a chance to practice what you've learned.

Good Style explains the tactics that can be used to write technical material in a coherent, readable style. It discusses in detail the choices of vocabulary, phrasing and sentence structure and each piece of advice is based on evidence of the styles preferred by technical readers and supported by many examples of writing from a variety of technical contexts. John Kirkman draws from his many years of experience lecturing on communication studies in Europe, the USA, the Middle East and Hong Kong, both in academic programmes and in courses for large companies, research centres and government departments. Good Style has become a standard reference book on the shelf of students of science, technology and computing and is an essential aid to all professionals whose work involves writing of reports, papers, guides, manuals or on-screen texts. This new edition also includes information on writing for the web and additional examples of how to express medical and life-science information.

Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.

"Pinker has a lot of ideas and sometimes controversial opinions about writing and in this entertaining and instructive book he rethinks the usage guide for the 21st century. Don't blame the internet, he says, good writing has always been hard. It requires imagination, taking pleasure in reading, overcoming the difficult we all have in imaging what it's like to not know something we do know."--Publisher information.

First published in 1997, this volume is an attempt to prise open the name of John Bunyan. It aims to examine the operations of that name, to explore the discursive techniques which produced the figure of this author, both in the seventeenth century and later, and to identify the different meanings which have been ascribed to it in the history of its production. It may be read as a 'Dear John' letter to the author, or as an exercise in cultural materialism which examines the production and reproduction of a particular figure of authority, the author, within specific cultural formations at different historical moments.
