#### **CONTENTS**

- Acknowledgments (p. 2)**
- Background (p. 3)**
- Changes and updates (p. 4)**
- Goals (p. 5)**
- Process (p. 7)**
- Recommendations (p. 11)**
- Appendices**
  - A. Technologies (p. 13)**
  - B. System architecture (p. 15)**
  - C. Decision points (p. 16)**
  - D. Screen captures (p. 18)**
  - E. Vega data model (p. 23)**
  - F. Site preparation example (p. 24)**
  - G. FAQs & Troubleshooting (p. 29)**
  - H. Installation report by Dr. Weathers (p. 32)**

# Current Status

- Off-the-shelf hardware available
- Data transmission generally easy
- Local data storage is no problem
- Managing the data is the challenge

# Characteristics We Want

- Easy -- does not require IM staff
- Allows for flexibility on buoy side
- Reliable
- Data quality can be checked
- Easy access to the data by multiple consumers
- Data can be shared
